

FOR IMMEDIATE RELEASE

July 8 2003

Arexis AB has today initiated a phase II clinical study in the area of lipid metabolism. The study will be completed before the end of this year. Further details will be released shortly.

Arexis AB is a drug discovery and development company, pioneering the use of genetics in highly selected disease models to pinpoint specific genes involved in multifactorial metabolic and inflammatory diseases. Founded in 1999, Arexis is dedicated to addressing unmet medical needs and delivering improved therapies based on effective and selective new drugs. The head office is in Gothenburg.
