Czech Police customer at SAS Flight Academy

In the end of August SAS Flight Academy signed a contract with Aerocopter Ltd., Czech Republic, for "Generic NVG Basic Course" for the Czech Police. Pilots from the Czech Police recently finished the NVG training in the SAS Flight Academy training facilities in Stockholm.

SAS Flight Academy's newly developed "Generic NVG Basic Course" is intended to facilitate the ease of implementation of NVGs for VFR night operations. The main purpose of this course is to provide future NVG operators with the theoretical knowledge, manual skills and operational procedures required for safe and efficient operation with NVIS equipment.

"We have noticed a dramatically increased demand on NVG training from operators all over the world", says Thomas Wallén, Director Sales & Customer Relations.

SAS Flight Academy provides training for pilots, cabin crews, maintenance technicians and ships' officers. The training facilities, located in Stockholm and Copenhagen, offer training for twelve different aircraft types, ranging from regional to long haul aircraft and helicopter.
