Sectra displays world-class mobile security solutions at TechNet Europe

Sectra will showcase its products at TechNet Europe, a military defense trade show at the Jolly Hotel Midas in Rome on October 16-17. Visitors are welcome to test our secure mobile telephones, which are used today by the most demanding defense and public sector customers within EU and NATO.

Sectra is one of the world's leading companies for secure mobile communication solutions. Sectra Tiger®, an eavesdrop-secure mobile telephone, was developed by Sectra in cooperation with experts from the Swedish Defense. The NATO telephone NSK 200, which is based on a further development of the same technology as Tiger, has achieved international success in recent years as a result of orders from NATO's central organization and NATO member nations such as Germany, the Netherlands, the Czech Republic and Norway.

Different variations of the Tiger telephone, including NSK 200 and country-specific adaptations, will also be displayed at Sectra's stand No. 7 in the Murano Gallery.

The Tiger® XS encryption terminal will also be shown internationally for the first time at TechNet Europe.

Tiger XS is a mobile security solution originally developed in a pilot study for the Swedish Defense. In addition to voice and data communications encryption, Tiger XS also offers opportunities to integrate various secure applications, such as mobile intranet. Sectra received the first order for its new Tiger XS product from a Finnish customer one week before the TechNet Europe trade show.

Sectra Communications AB develops and sells eavesdrop-secure mobile communication systems, high-speed encryption for telecom and data lines as well as tactical radio systems. Customers are defense departments and government authorities in Europe and within NATO with extremely high demands on communications security. Sectra has strong core expertise in encryption and is one of the leading companies in the world in the design and development of secure communication systems.

Sectra's operations

Sectra has its roots in Linköping Technical University and is one of Sweden's fastest growing high-tech companies in the IT area. Since the mid-1980s, Sectra has successfully conducted development and sales of high-technology medical IT and telecommunications products. Today, the business includes products in medical systems, secure communication systems and wireless information systems.

Sectra's secure communications business is conducted in Sectra Communications AB, which is a wholly-owned subsidiary of Sectra AB. Sectra Communications is one of the world's leading companies in the design and development of secure communication systems. The Tiger system is in use by customers in Sweden, Norway, Germany, the Czech Republic, the Netherlands, Finland, NATO's central organization and US EUCOM.

Business is conducted in eight countries with a total of 280 employees. Sales for the fiscal year 2002/03 reached SEK 503 million. Since March 1999, Sectra's shares have been quoted on the O list of the Stockholm Exchange.
