

Enea Signs Frame Agreement with Trimble

Enea Embedded Technology AB has concluded a frame agreement with Trimble AB starting 2004. The agreement applies to consultant services for the development of software in embedded real-time systems. Trimble is a world leader in the development and marketing of instruments for measuring position and uses technologies such as GPS, lasers and optics.

“We are very glad that we’ll be using Enea’s capabilities in real-time technologies in the form of services for systems development, since we already embed their real-time operating system OSE in our products,” says Torsten Spaak, Purchasing Manager at Trimble.

“Our concept with its combination of products and services in real-time technology has again been well received, and this time by a customer with a very high level of specialization in their area,” says Ola Berglund, CEO, Enea Data AB.

Using our more than 35 years of experience in systems development and knowledge of real-time technology, we assist our customers in Sweden and the rest of the world to build advanced systems where quality, high availability and usability are decisive. We share the knowledge we have gained with our customers through our products, services and training courses.

With the support of the real-time technologies we have developed ourselves, we have assisted many customers to make their ideas a reality in a way that is assured and cost-efficient.

Enea's world leading real-time operating system OSE is used for many products from datacom and telecom suppliers.

Within the Nordic region, Enea offers services, training and system solutions for business support to companies, organizations and government agencies whose demands on usability and reliability are exceptionally high.

The group comprises 550 employees and has offices in Sweden, USA, Germany, France, the UK, and Japan. Enea's head office is located in Täby, Sweden.

Enea Data AB's stocks are listed on the Stockholm Stock Exchange's O-list.
