ADDITIONAL INFORMATION TO THE RELEASE ON DEAL BETWEEN ARTEMIS FINLAND AND VR-
TRACK

Artemis Finland Oy, the subsidiary of Proha Plc's subsidiary Artemis International Solutions Corporation, will deliver a resource management system for the Finnish company VR-Track Ltd. The deal is a strategically significant expansion for the sales of the Artemis 7 family of products. The deal has a significant financial effect for Artemis Finland but as an individual deal it does not have an essential impact on the net sales of the Proha Group for 2004.

Proha in brief

Proha is a leading, globally operating portfolio and project management solution provider and the largest software product company in Finland. Proha's solutions help its corporate customers to carry out their strategies, allocate their resources productively and control their operative functions as profitably as possible. The Proha Group's net sales were EUR 100.8 million in 2002. Nearly 90% of net sales originate from outside Finland. The Group employs approximately 650 professionals with over 500 of them outside Finland.
