## Digital Vision has received an additional order from PBS

**Stockholm, March 16, 2004** – Digital Vision AB has received an additional order from the US-based company PBS (Public Broadcasting Service). This order is comprised of 34 units of digital television satellite receivers/decoders.

As earlier announced, Digital Vision has been selected by PBS as a supplier of equipment, for high definition TV, to its TV-stations all around the US. Until today, Digital Vision has delivered more than 500 satellite receivers/decoders to PBS.

PBS, headquartered in Alexandria, Virginia, is a private, non-profit media enterprise owned and operated by the nation's 350 public television stations. The service is available to 99 percent of American homes with televisions and to an increasing number of digital multimedia households.

Digital Vision's business concept is to offer state-of-the-art technology and products to clients in film/video, multimedia and the distribution of digital television:

- Media Mastering, e.g. the digital mastering of feature films, TV-shows and commercials and the adaptation of these to DVD
- Media Networking, the adaptation of images and sound to digital transmission networks

Digital Vision was founded in 1988 and today the company is comprised of the Swedish parent company and a sales company in the U.S. The company is dedicated to the development and the sales and support of systems. Digital Vision is listed on the Stockholm stock-exchange.
