

Press Release

Digital Vision shows Dual HDTV decoders in 1RU at NAB2004

Stockholm, April 14, 2004 – Digital Vision AB will at NAB2004 show the BitLink Professional HDTV Decoder and Satellite receiver in a new and cost-effective configuration, with dual MPEG-2 decoder modules in 1RU. The new configuration will be available at the end of the second quarter 2004.

BitLink Professional HDTV Decoder meets the highest standards in picture quality, flexibility and reliability, for both HDTV and SDTV. The BitLink platform affords cable, satellite and terrestrial operators, plus new players, a cost effective and flexible way to transit to the DTV market.

More than 500 BitLink Professional HDTV Decoders has so far been installed in USA.

Digital Vision's business concept is to offer state-of-the-art technology and products to clients in film/video, multimedia and the distribution of digital television:

- Media Mastering, e.g. the digital mastering of feature films, TV-shows and commercials and the adaptation of these to DVD
- Media Networking, the adaptation of images and sound to digital transmission networks

Digital Vision was founded in 1988 and today the company is comprised of the Swedish parent company and a sales company in the U.S. The company is dedicated to the development and the sales and support of systems. Digital Vision is listed on the Stockholm stock-exchange.
