

# Enea Signs General Agreement with Leading Telecom Provider

**Enea has signed a new product frame agreement with Ericsson. The multiyear agreement is based on a new licensing model and covers OSE products for Ericsson's 3G platforms for telecom systems products as well as mobile phone products.**

The new licensing agreement is royalty based.

- We are honored by Ericsson's continued trust in our products. The agreement confirms Enea's world-class level offer, says Johan Wall, President and CEO of Enea.

For Enea this agreement also confirms the strategy to increase focus on the product family OSE and the telecom market. OSE is used in mobile phones and radio base stations. Enea's offer includes the product family OSE, product oriented consultancy services and related highly qualified services.

*Enea's stock is listed on the Stockholm Stock Exchange's Attract-40-list.*

## **Facts about OSE**

*OSE is a world leading real time operating system (RTOS) primarily for the telecom industry. Around half of all telecom radio base stations and 15 percent of all mobile phones in the world have OSE inside. OSE's product features are uniquely suitable for telecom infrastructure and mobile phone systems. Enea provides OSE and related consulting services and support to leading telecom industry clients world wide.*
