

Teligent won strategic deal in Asia

Next Generation Messaging Solution to Singtel

Teligent has been awarded a contract from SingTel, Asia's leading mobile operator. The contract is for a sizeable Next Generation Messaging Solution replacing existing legacy voice and fax mail systems. The Teligent solution will handle multiple applications and mailboxes, for all networks (fixed and mobile) cost efficiently on a single platform.

Teligent's advanced messaging solution is a flexible and distributed system, built on the patented Teligent P90/E architecture that separates network signalling, service execution and presentation to end-users.

The delivery from Teligent will include the Teligent Application Builder; a sophisticated graphical programming tool offering the mobile operator complete control over the development and implementation of new enhanced services and features.

"We are very well positioned for large Next Generation Messaging Solutions. With a strong reference base and our leading technology we see a very interesting replacement and consolidation market ahead", said Ulf Lindstén, President and CEO of Teligent. "During the first six months this year, we have successfully engaged with two major accounts in the Asia Pacific region. The relationships with premier regional players on the growing Asian market are very important for our establishment and, I am confident that it will significantly enhance our growth in this fast growing Asian telecom world."

SingTel is Asia's leading communications group with operations and investments in more than 20 countries and territories around the world. The Group employs more than 19,000 people around the world and had a record turnover of S\$12 billion (US\$ 7 billion) for the year ended 31 March 2004. Together with its regional partners, SingTel is Asia's largest multi-market mobile operator, serving more than 47 million customers in six markets – Australia, India, Indonesia, Philippines, Singapore and Thailand.

The Next Generation Messaging Solution for SingTel is based on the patented Teligent P90/E middleware platform, which is implemented in various configurations by a large number of leading carriers in the international telecommunications market, including BT, Cingular, MCI, T-Mobile USA, Telefónica, Tele2, Telia and members of the Vodafone group.

About Teligent

Teligent develops, markets and sells advanced value added services for telecommunications networks. The services and applications provided by the company are based on the generic service development platform, the Teligent P90/E. Teligent's solutions are currently utilised by leading telecom operators, for example BT, Cingular, MCI, T-Mobile USA, Telefónica, Tele2, Telia and members of the Vodafone group. Teligent was founded in 1990 and has been listed on the Stockholmsbörsen (the Stockholm Stock Exchange) since 1999. With offices throughout the Americas, Asia/Pacific, Europe and the Middle East as well as international partnerships, the company combine global reach with expertise in local market requirements. Teligent has approximately 290 employees and had in 2003 a turnover of SEK 255 million. For further information please visit www.teligent.se
