## INTERIM PERIOD

- Net sales amounted to 3,273 MSEK $(3,257)$.
- Net earnings amounted to 109 MSEK (116).
- Earnings per share amounted to 4.45 SEK (4.73).
- Order intake increased by 11 percent when adjusted for exchange-rate fluctuations.
- Strong growth within Dehumidification.

|  | $\mathbf{2 0 0 4}$ | $\mathbf{2 0 0 3}$ | Change | Adjusted <br> change ${ }^{1}$ |

${ }^{1}$ Current Group structure adjusted for currency fluctuations.

## Munters' operations

Munters is the world leader in moisture control with products and services for water and fire damage restoration and dehumidification, humidification and air cooling.

Operations are organized into three regions Europe, the Americas and Asia. In each region, operations are subdivided into the following three divisions: Dehumidification, Moisture Control Services (MCS) and HumiCool. Manufacturing, sales and services are carried out through the Group's own companies, which have 3,003 fulltime employees in 28 countries. Munters' shares
are quoted on the O list, Attract 40 segment, of the Stockholm Stock Exchange.

Market trend during the third quarter
The market trend within Dehumidification and HumiCool during the third quarter was similar to that of the first two quarters. The industry's willingness to invest, especially in Region Americas and Asia, was good which increased demand mainly within Dehumidification. Demand from the insurance industry in Europe for damage restoration was low during the first half of the quarter, but showed an increasing trend during the latter part. Demand for MCS was good, especially in America as a result of the hurricanes that hit Florida. Also in

Australia demand remained good. The poultry industry enjoyed improved demand during the quarter compared with the previous year.

In Region Europe, the market for Dehumidification remained weak. Demand for MCS services from the insurance industry improved from a low level. Within HumiCool, demand remained strong in most segments, but especially for components for the treatment of emissions from coal-fired power plants.

In Region Americas, demand within Dehumidification for dehumidification-, DesiCool- and Zeolsystems continued to increase during the third quarter. Demand for MCS services was very high during the quarter as a result of the hurricanes which ravaged Florida, Alabama and Mississippi. For HumiCool, demand was strong for cooling systems for the AgHort industry while demand for components for evaporative cooling systems remained weak.

In Region Asia, demand within Dehumidification increased after the previous quarter's fall. Within MCS, demand remained strong as a result of the continued broadening of the customer base as well as an increased supply of services in Australia. For HumiCool, there was a low level of activity in the AgHort market in Thailand and South East Asia. Demand for components for evaporative cooling systems remained strong.

Group development during the third quarter

## Order intake

Order intake for the third quarter increased by 13 percent to 1,161 MSEK $(1,032)$. When adjusted for exchange-rate fluctuations for the current structure, order intake increased by 15 percent.

At the end of the quarter, the backlog was 777 MSEK (593). When adjusted for exchange-rate fluctuations the increase was 32 percent.

The good order intake during the quarter was mainly due to the strong trend within Dehumidification, but also to the improvement within MCS. Large orders for pre-coolers for gas turbines, a high level of activity within the poultry industry and increased demand for components for the treatment of emissions from coal-fired power plants contributed to the good order intake. Demand for Zeol systems continued to improve. Order intake within MCS improved as a result of a slightly improved demand in Europe and a continued strong demand in Americas and Asia.

## Net sales

Consolidated net sales increased by 6 percent to 1,127 MSEK (1,059). When adjusted for exchangerate fluctuations for the current structure, the increase was 9 percent.

## Earnings

EBIT fell by 4 percent to 73 MSEK (76) after amortization of goodwill and surplus values of 10 MSEK (11). When adjusted for exchange-rate fluctuations for the current structure, the fall was 1 percent.

Lower operating earnings within HumiCool were partly compensated for by significantly improved
earnings within MCS, whereas currency rates affected earnings by 3 MSEK. The operating margin amounted to 6.4 percent (7.2).

Consolidated earnings before taxes amounted to 69 MSEK (69). Net earnings for the quarter fell to 40 MSEK (43) after a tax rate of 41 percent (38). When adjusted for non-deductible amortization of goodwill and surplus values, the tax rate was 37 percent (34). Earnings per share amounted to 1.62 SEK (1.73).

## Action program and decided rationalizations

As a result of continued weak demand within some parts of the MCS operation in Europe, a decision was made after the first quarter of 2004 to implement additional measures to cut costs in these units during the second and third quarters of 2004. These measures will achieve cost reductions of approximately 20 MSEK on an annual basis and give rise to one-time costs of approximately 8 MSEK. Third quarter earnings were charged with 4 MSEK (6 MSEK accumulated during the year) for this action program. The program is expected to make a full impact from the first quarter of 2005.

During the second quarter, a decision was taken to concentrate all European production of CELdek ${ }^{\odot}$ (components for cooling systems) to Munters' plant in Imperia, Italy. The relocation will take place in the fourth quarter of 2004 and production will start during the first quarter of 2005. During the third quarter, earnings were charged with 1 MSEK (10 MSEK accumulated during the year) for this move. No further costs are estimated to be charged to the earnings.

During the previous quarter, the production of CELdek ${ }^{\ominus}$ was relocated from a plant in Phoenix, USA to Monterrey, Mexico. During the quarter, earnings were charged with 0.5 MSEK for the move of this plant ( 7 MSEK accumulated during the year).

During the quarter, HumiCool's operation in Europe for mist eliminators and components for water treatment in Aachen, Germany was relocated into new production and office premises within the same city. The relocation will be completed during the fourth quarter of the current year. During the third quarter, 1 MSEK was charged to earnings for the move.

## Regional development during the third quarter

## Region Europe

During the quarter, order intake in Region Europe increased by 10 percent to 676 MSEK (615). Sales increased by 2 percent to 658 MSEK (643). Operating earnings (EBIT excluding goodwill amortiza-
tion and surplus values depreciation) fell by 17 percent and amounted to 35 MSEK (42). Operating earnings were affected by uneven capacity utilization within MCS and costs for the move of CELdek ${ }^{\ominus}$ production to Italy.

The Dehumidification division reported low order intake. Sales were weak compared with the previous year due to the poor order intake during the second quarter. Operating earnings were significantly lower than in the previous year as a result of low sales. As a result of implemented cost reductions, the effect on earnings was limited.

The MCS division reported increased order intake during the quarter compared with the previous year in spite of continued low demand from the insurance industry. An increase in small damages could however not compensate for the lower demand for large water and fire damage services. This led to uneven capacity utilization resulting in lower margins. Sales were on a par with the previous year, whereas operating earnings were slightly lower.

The HumiCool division reported continued significantly increased order intake and increased sales during the quarter, but lower operating earnings. Earnings were affected by 1 MSEK for relocating the CELdek ${ }^{\ominus}$ production from Sweden to Italy. Components for the treatment of emissions from coal-fired power plants enjoyed a continued positive trend. The poultry industry reported significantly higher activity during the quarter. However, exchange-rate fluctuations and higher prices for materials led to reduced margins. Order intake for products for cooling inlet air to gas turbines continued to improve.

## Region Americas

During the quarter, order intake in Region Americas increased by 18 percent to 395 MSEK (335). When adjusted for exchange-rate fluctuations for the current structure, order intake increased by 28 percent. Sales rose by 15 percent to 387 MSEK (335). When adjusted for exchange-rate fluctuations for the current structure, sales increased by 25 percent. Operating earnings for the quarter increased by 4 percent to 41 MSEK (39). When adjusted for exchange-rate fluctuations for the current structure, the increase was 12 percent. Earnings continued to be affected by production interruptions and quality problems at the start-up of production in Mexico.

The Dehumidification division reported significantly higher order intake and sales, and improved operating earnings compared with the previous year. During the quarter, demand in all product areas remained strong.

The MCS division reported significantly higher order intake, sales and earnings compared with the previous year. During the quarter, several orders were received as a result of the hurricanes that ravaged Florida. This, together with stable underlying demand, made a positive impact on order intake, sales and earnings. So far, the order volume relating to these hurricanes has amounted to 7 MUSD. In addition, the expanded service supply continued to affect order intake positively.

The HumiCool division reported reduced order intake; sales on a par with the previous year; and a significant fall in operating earnings compared with the previous year. Order intake for cooling systems for the poultry industry was stronger than during the corresponding quarter in the previous year. However, order intake for components for evaporative cooling systems and demand for products for cooling inlet air to gas turbines remained low.

## Region Asia

Region Asia continued to develop positively during the quarter. However, new breakouts of the chicken flu in Thailand affected order intake.

Order intake, sales and operating earnings continued to develop positively. During the quarter, order intake increased by 15 percent to 114 MSEK (100). When adjusted for exchange-rate fluctuations for the current structure, the increase was 17 percent. Sales rose by 8 percent to 104 MSEK (96). When adjusted for exchange-rate fluctuations for the current structure, the increase was 11 percent. Operating earnings increased by 10 percent to 11 MSEK (10). When adjusted for exchange-rate fluctuations for the current structure, operating earnings increased by 13 percent.

The Dehumidification division reported a significant increase in order intake but lower sales and reduced operating earnings compared with the previous year. The fall in margin is due to the low margin in some projects and negative currency effects on sales of European products.

The MCS division. An expanded customer base and favorable weather contributed to a significantly increased order intake, sales and operating earnings compared with the previous year.

The HumiCool division reported lower order intake due to new breakouts of the chicken flu, mainly in Thailand. Sales and operating earnings increased compared with the previous year. Sales of pre-coolers for gas turbines and components for evaporative cooling systems continued to develop strongly.

## Developments during the interim period (January-September)

## Order intake

The Group's order intake for the interim period increased by 7 percent to 3,509 MSEK $(3,280)$. When adjusted for the current structure, order intake increased by 11 percent.

Order intake increased by 5 percent in Region Europe, by 8 percent in the Americas and by 19 percent in Asia. When adjusted for the current structure, order intake increased by 6 percent in Europe, by 19 percent in the Americas and by 21 percent in Asia.

## Net sales

Consolidated net sales rose by 1 percent to 3,273 MSEK $(3,257)$. When adjusted for the current structure, net sales increased by 4 percent.

Net sales fell by 1 percent in Region Europe while sales increased by 1 percent in the Americas and by 17 percent in Asia. When adjusted for the current structure, sales fell by 1 percent in Region Europe while sales increased by 11 percent in the Americas and by 18 percent in Asia.

## Earnings

The Group's EBIT fell by 8 percent to 202 MSEK (221) after goodwill amortization and surplus values of 30 MSEK (33). When adjusted for exchange-rate fluctuations for the current structure, EBIT fell by 4 percent.

The operating margin amounted to 6.2 percent (6.8). When adjusted for exchange-rate fluctuations, the operating margin was 6.7 percent in the previous year. Earnings have been charged with 23 MSEK this year (previous year: 8 MSEK) for costs relating to action programs and rationalizations as described in the interim reports for the current quarter and the previous quarters.

In Region Europe, operating earnings fell by 18 percent. The entire fall is explained by the negative earnings trend within MCS in Europe. In the Americas, earnings fell by 6 percent due to costs related to relocation of a plant, and lower margins within HumiCool. Earnings increased by 20 percent in Region Asia thanks to a strong development within MCS and HumiCool. When adjusted for exchange-rate fluctuations for the current structure, the fall was 17 percent in Region Europe, while earnings increased by 4 percent in the Americas and by 18 percent in Asia.

Consolidated earnings before taxes amounted to 191 MSEK (202). Net earnings for the period fell
by 7 MSEK to 109 MSEK (116) after a tax rate of 43 percent (42). When adjusted for non-deductible amortization of goodwill and surplus values, the tax rate was 38 percent (37). Earnings per share amounted to 4.45 SEK (4.73).

## Capital expenditure

The Group's capital expenditure in tangible fixed assets amounted to 70 MSEK (95) during the period. The majority, 43 MSEK, relates to investment in MCS equipment. The majority of other investments consist of new investments related to moving plants which is described above. Depreciation and write-downs amounted to 139 MSEK (132), of which amortization of goodwill and surplus values accounted for 30 MSEK (33).

## Financial position

The equity ratio amounted to 44 percent at the end of the period ( 46 at the start of the year). Liquid funds amounted to 116 MSEK (125 at the start of the year) and interest-bearing liabilities and provisions to 505 MSEK (463 at the start of the year). Since the start of the year, the net debt has increased by 51 MSEK to 389 MSEK. During the period, 85 MSEK was paid in dividend to the shareholders and 40 MSEK was paid in additional purchase prices relating to previous acquisitions. The Group has unutilized loan facilities of 192 MSEK.

## Personnel

At the end of the quarter, the number of full-time staff was 3,003 , a reduction of 67 since the turn of the year. In Region Europe, the number fell by 68; in the Americas, it increased by 13; and in Region Asia, the number fell by 11. The increase in Region Americas mainly relates to the doubling of staff in connection with relocating the production of CELdek $^{\odot}$ from the USA to Mexico.

## Nomination Committee

In accordance with the decision by the Annual General Meeting (AGM), a Nomination Committee has been appointed ahead of the next AGM. It consists of representatives of the company's largest shareholders. The task of the Nomination Committee is to put forward proposals ahead of the next AGM for the election of Board of Directors; appointment of Auditors where applicable; and remuneration. The Nomination Committee appointed ahead of the next AGM consists of Carl-Olof By
(Industrivärden), Gustaf Douglas (Latour), Sten Kottmeier (AMF Pension), Magnus Bakke (Robur fonder) and Peter Rudman (Nordea fonder). They represent 53 percent of qualified voting shares in the company. In addition, the Nomination Committee could decide that the Chairman of the Board, Berthold Lindqvist, should be included in the Committee. Individual shareholders can give proposals of board members to the Nomination Committee for further evaluation within the frame of its work.

## Comments on the accounts

This report has been prepared in accordance with the Swedish Financial Accounting Standards Council's recommendation RR20 'Interim Financial Reporting'. The same accounting principles and calculation methods have been applied as in the latest Annual Report with the following amendment.

From 2004, Munters will apply the new Swedish accounting recommendation RR 29 'Employee Benefits'. It agrees in substance with the international standard IAS 19 'Employee Benefits'. By the application of RR 29, benefit-based schemes relating to pensions and other benefits will be reported in accordance with common principles. Before 2004, these were reported in accordance with local rules in each country. In accordance with the recommendation's transitional regulations, an opening pension liability has been set, calculated in accordance with the new principles as at January 1, 2004. As a result, the Group's pension liability has increased by 3 MSEK. Shareholders' equity has decreased by 2 MSEK after deduction for deferred tax. The transition has not had any tangible effect on the period's pension costs. In accordance with the recommendation's transitional regulations, previous financial years have not been recalculated.

## Review report

We have reviewed this Interim Report in accordance with the recommendation issued by the Swedish Institute of Authorized Public Accountants, FAR. A review is considerably restricted compared with an audit. Nothing has emerged which indicates that the Interim Report does not comply with the requirements stipulated in the Stock Market and Annual Report Acts.
