

## MultiQ scores highest

*MultiQ 158 Executive scores highest on MacWorld test.*

The MultiQ 158 Executive is the best monitor around. It has an outstanding screen that works perfectly despite its analog terminal. But that terminal is just what makes this superior monitor accessible to everyone.

The MultiQ 158 Executive is a superb monitor that doesn't sacrifice the tiniest bit of quality. And don't forget that it's a Swedish product. It has a very wide viewing angle of 160 degrees, which means that you can look at it from way on the side without missing out on either luminosity or color depth. The virtues of the excellent LCD display come into play with ordinary use as well. No matter how you move around in your chair, the picture is identical. You'd have to be practically sitting on the floor before you noticed any difference. An unsurpassed monitor, no two ways about it.

MacWorld, no. 2, March 2001
