

More MultiQ monitors for Frankfurt Airport

The Malmö company MultiQ has received an order for 770 flat-panel monitors for Frankfurt Airport. This first follow-up order means that MultiQ will be delivering over 1100 of these monitors to Frankfurt. The orderer is SITA, international specialists in fitting out airports. On this occasion, the monitors will be installed at check-in desks for all airlines at Frankfurt Airport. Delivery will commence in the third quarter of this year and be completed by the end of the year.

Now we feel that things are coming to fruition. We've been systematic in establishing the concept of flat-panel monitors tailored to the customer. The customer segment is well defined, both on the national and the international market. We've also been conscious of the fact that the sales process often takes a long time, but we're now starting to see results, which we're naturally extremely pleased about, says Martin Gullberg, MD of MultiQ AB.
