

Den Norske Bank chooses MultiQ

MultiQ AB has, through its Norwegian subsidiary, received an order worth approx. NOK 4.6 million. The order is for the delivery of screens to DnB NOR's new generation PC package and includes in total some thousand 192 Executive screens that will be delivered during February and March 2005. "It is extra gratifying that DnB NOR for a second time chooses to offer our screens to its staff," says Jonas Wästberg, CEO MultiQ AB. We also delivered screens to DnB NOR's earlier PC package, in 2000."

MultiQ is together with Complit AS, HP, IBM and Telenor one of several suppliers of the offer. Complit AS and MultiQ have co-operated on several PC projects on the Norwegian market, but the current order from DnB NOR is by far the largest to date.

The choice of MultiQ is based on the durability and performance of the screens - properties that are valued as just as highly at home as in the public environments where MultiQ screens usually can be found.

MultiQ screens are also used internally at the DnB NOR Group, among others at DnB NORs Markets.
