World networking leader licenses Mobile IP technology from ipUnplugged

Stockholm, Sweden, May, 17th, 2005 — ipUnplugged, the leading provider of IP mobility solutions, today announced a collaboration with Cisco Systems, to help meet customer demand for end-to-end IP mobility. The integration of ipUnplugged's IP mobility technology into Cisco's mobility solutions offers enterprise and service provider customers the combined benefits of Cisco's global mobility offerings with ipUnplugged's technology for fast and secure seamless roaming between the cellular and WiFi net work.

ipUnplugged's solutions have been successfully implemented at Capgemini in London. "Capgemini, has decided to roll-out ipUnplugged's Secure Mobility solution starting at the Capgemini office in London, UK, which will offer easy to use and highly secure seamless mobility for our employees and visitors," said Ian Hames, NEA Infrastructure Strategy Manager, Capgemini. "The ipUnplugged solution has shown great productivity improvement for our organization, both for the employees and guests".

ipUnplugged joined the Cisco Technology Partner Program as a Mobile IP technology participant. Through participation in the Cisco Technology Partner Program, ipUnplugged's Mobile IP client technology has met Cisco's Technology Partner Program test criteria for interoperability with the Cisco Mobile IP based products, and is aimed to be bundled with Cisco's mobility solutions .

"This relationship with Cisco represents a significant milestone for ipUnplugged, both in our efforts to provide seamless roaming technology to the rapidly growing marketplace and in our strategy to become a trustworthy partner to industry, technology, and market leaders worldwide," said Lars Cedergardh, CEO ipUnplugged.

"This partnership emphasizes Cisco's commitment to be the leading provider of end-to-end IP mobility solutions, to both the service provider and enterprise markets," said Dima Khoury, Director of Engineering at Cisco Systems. "We are pleased to be working with ipUnplugged, as their IP Mobile technology will complement and enhance our global offering around IP Mobility.

About ipUnplugged AB:

ipUnplugged is the leading developer of Network Services software for secure and seamless roaming across public and enterprise LANs, WLANs, GPRS, CDMA and 3G networks. ipUnplugged's Roaming Client, Roaming Gateway and Roaming Server software enables users to roam securely and seamlessly from one network to another without having to reconnect, change settings or lose connectivity at any point in time. The products are based upon industry standards and technology like Mobile IP, IPsec and standard AAA. ipUnplugged AB is privately held. The corporate headquarters is located in Stockholm, Sweden.
