# Telelogic Recognized for Industry Leadership in Multiple Categories on *SD Times* Top 100

*- Influential Software Development Publication Cites  
Telelogic Solutions for Modeling and Collaboration -*

**MALMÖ, Sweden and IRVINE, California – May 24, 2005** – Telelogic (Stockholm Exchange: TLOG), the leading global provider of solutions for advanced systems and software development, today announced that American publication *SD Times*, an influential software development magazine, has recognized Telelogic in two categories on its annual Top 100 listing. The publication annually ranks what it believes to be the Top 10 companies in 10 different categories related to software development.

According to Alan Zeichick, editor-in-chief of *SD Times*, "Each year, we seek to identify the movers and shakers – not merely the biggest of the big (though such companies are nearly always influential). The companies and organizations cited in the *SD Times* 100 are those that we believe demonstrated the greatest amount of leadership, either through market clout or meaningful technological innovation."

Zeichick stated that a clever new tool or interesting paradigm isn't enough to demonstrate leadership. "To lead, others must follow," he said. "We define the *SD Times* 100 as being those organizations, individuals or movements that were talked about, those that created not only great technology, but also great buzz."

Telelogic was included on the Collaboration and SCM (Software Change Management) Top 10 where the publication noted, "Begins and ends with everyone on the same requirements page." Telelogic solutions in this category include Telelogic DOORS<sup>®</sup>, the industry's leading requirements management solution, and Telelogic SYNERGY<sup>™</sup>, the company's integrated change/configuration management suite.

Telelogic was also included in the Modeling Top 10 where *SD Times* stated that Telelogic "Rounds out round trip engineering among models, C++ and Java code." Telelogic solutions in this category include the Telelogic TAU<sup>®</sup> suite of modeling, design, development and testing tools. Popkin Software, which was acquired by Telelogic on April 18, 2005, was also listed on the Modeling Top 10. The publication noted that Popkin "Models entire enterprise architecture, not merely software projects."

"We are proud that Telelogic has been selected once again by *SD Times* as an industry leader and innovator," said Anders Lidbeck, president and CEO of Telelogic. "Appearing in multiple categories shows the depth and breadth of our software development solutions, which have been further enhanced by our recent acquisitions of Popkin Software and tender offer for Focal Point."

**About SD Times**

Launched in February 2000, BZ Media's SD Times is the newspaper of record for the software-development industry. SD Times is published twice monthly in identical print and digital editions, and can also be read online at [www.sdtimes.com](http://www.sdtimes.com).

**About Telelogic**

Founded in 1983, Telelogic® is a leading global provider of solutions for advanced systems and software development. Telelogic's intuitive, best-in-class software tools automate and support best practices throughout the development lifecycle, leaving development teams free to concentrate on core competencies and apply their skills and energy to value-added tasks. By optimizing each phase of development, Telelogic enables companies to deliver higher quality systems and software with greater predictability, reduced time-to-market and lower overall costs.

To ensure interoperability with third-party tools, Telelogic's products are built on an open architecture and standardized languages. As an industry leader and technology visionary, Telelogic is actively involved in shaping the future of advanced systems and software development by participating in industry organizations like ETSI, INCOSE, ITU-T, OMG, Eclipse and others.

Headquartered in Malmö, Sweden with U.S. headquarters in Irvine, California, Telelogic has operations in 17 countries worldwide. Customers include Alcatel, BAE SYSTEMS, BMW, Boeing, DaimlerChrysler, Deutsche Bank, Ericsson, General Motors, Lockheed Martin, Motorola, NEC, Nokia, Philips, Siemens, Thales and Vodafone. For more information, please visit [www.telelogic.com](http://www.telelogic.com).

Telelogic, Telelogic DOORS, Telelogic DocExpress, and Telelogic TAU are the registered trademarks of Telelogic.

Telelogic TAU Architect, Developer, Tester, SYNERGY and ActiveCM are trademarks of Telelogic. All other trademarks are the properties of respective holders.
