SWE-DISH announces cooperation with Anitcom

SWE-DISH Satellite Systems today announces a cooperation with Anitcom to strengthen its position as a total solutions provider of satellite communication network for voice, video and data.

SWE-DISH's cooperation with the Australian based company, Anitcom, will strengthen SWE-DISH's position as a total solutions provider of portable telephony and data network on the Australian and Asian market. Anitcom has a strong position and experience from advanced mobile network solutions for the Australian defense industry, Federal and State Government agencies, and Corporate Enterprise.

SWE-DISH now expands its offer for complete network solutions for broadcaster, as well as governmental organizations and defense user groups on different levels. The network solution gives broadband connectivity and increased usability at a low cost. The benefit with the cooperation is to offer network solutions that are mobile, modular and scaleable, quick-to-air and saving operational cost.

When using the portable communication center from Anitcom, together with the SWE-DISH Satellite equipment, up to 50 users can be connected for web browsing, email, office applications, IP and analogue telephone in the field. Modular expansion will allow for further users.

"As the local distributor of SWE-DISH products in Australia, we are delighted to also have this partnership that will see them offer our products. From day one we saw our systems as the perfect companion to SWE-DISH terminals. Our aim is to provide low cost, rapid to market and high capability improvements to remote and mobile defense communications." says, Andy Collings, Sales and Marketing Director, Anitcom.

"We are very positive regarding this cooperation. It is a natural next step in our global strategy to become a total solution provider for our customers in this region" says Lars Jehrlander, CEO at SWE-DISH Satellite Systems.

ABOUT SWE-DISH

SWE-DISH Satellite Systems is a world-leading supplier of mobile satellite communications equipment and related services for broadband applications. The company supplies major broadcasters, armed forces and disaster relief organizations amongst others, with compact and quick-to-air satellite terminals for live transmission of video, data, internet and voice content from anywhere in the world. The customer base includes broadcasters such as CNN and BBC, disaster relief organizations and military organizations such as United Nations, NATO, Danish Defense, the Swedish Defense Materiel Administration (FMV) and the US Department of Defense. SWE-DISH was established 1994. <http://www.swe-dish.com>.
