

For immediate release:

Flight Deck Resources Inc. and European Aeronautical Group join forces to form strategic Sales, Marketing and Engineering Alliance.

In an effort to fortify each other's product offerings and benefit from collaborative software and hardware development expertise, Flight Deck Resources Inc. (FDR) and European Aeronautical Group (EAG) have joined forces by signing a strategic sales, marketing and engineering agreement enabling each company to provide complete turnkey Electronic Flight Bag (EFB) solutions including a powerhouse of software application products specifically developed by each company and tailored for EFB use.

Collectively FDR's Class 2 and Class 3 superior EFB hardware and software product offerings in conjunction with EAG's incredible suite of application products afford this new team the ability to completely satisfy the challenging economic and technologically advanced EFB requirements of today's aviation industry with a single solution said Keith L. Lockwood, FDR President and CEO.

Gunnar Öhrn, VP Sales and Marketing for EAG: "We see an increasing demand in all our markets for efficient EFB solutions. Our alliance with FDR will enable us to meet that demand with very good integrated products. FDR's hardware and software EFB solutions provide excellent platforms for our electronic products."

Headquartered in Southern California's premier high tech area in the City of Irvine, Flight Deck Resources Inc. is a leading independent supplier of single-source turn-key Electronic Flight Bag, Flight Deck and Cabin Management solutions to corporate aviation, commercial airlines, and aircraft fleet operators worldwide.

European Aeronautical Group is headquartered in Stockholm, Sweden with a subsidiary in London, UK. EAG offers a complete aeronautical portfolio with route documentation including The Route Manual, eRM, Aerad, eAerad, flight planning applications, performance applications, FMS databases for all major FMC systems, and a new weight and balance application to be released this summer. EAG's eRM electronic route documentation system is the only product of its kind that has been approved by the authorities for navigation without paper back-up.
