

For immediate release:

**British Airways and British Airways CitiExpress First Users of European Aeronautical Group's eAerad Electronic Charts Product.**

At a meeting 6 July, British Airways and European Aeronautical Group agreed the terms for the use by BA and BA CitiExpress of eAerad, EAG's electronic adaptation of the well-known Aerad aeronautical charts.

eAerad, which was launched at EAG's Customer Seminar in London in May, is based on EAG's successful eRM platform.

British Airways and BA CitiExpress will initially use eAerad for office, planning, and crew briefing purposes.

Peter Crouch, Manager Aerad at EAG UK Ltd: "We are very proud to have British Airways and BA CitiExpress as launch customers for eAerad and see this as yet another manifestation of our ongoing support for one of the world's leading airlines."

European Aeronautical Group is headquartered in Stockholm, Sweden with a subsidiary in London, UK. EAG offers a complete aeronautical portfolio with route documentation including Aerad, eAerad, the Route Manual, eRM, flight planning applications, performance applications, FMS databases for all major FMC systems, and a new mass and balance application to be released this summer. EAG's eRM electronic route documentation system is the only product of its kind that has been approved by the authorities for an all-electronic navigation without paper back-up.
