## Market areas

## Scandinavia

The market in Scandinavia is estimated to be strong in both renovation and new construction segment. Low interest rates and stable prices of real estate combined with a continuous strong interest for home interior (kitchens and baths) among consumers are still strong driver in the market.

New product introductions have been made by many brands and marketing through TV commercials have been intensified.

The continuous drive to develop the distribution channels is ongoing at all subsidiaries and includes new openings as well renovations of current distributors. Kvik plans to open approximately 25 new stores in 2006 (compared to 17 in 2005) and opened the first store in Belgium in the beginning of the year

## Great Britain

The demand in our primary segment, new construction of single family homes, is continue to be weak. The order value per kitchen has been managed to increase as more kitchens are delivered including white goods and installations

Focus on lead-time and work-flows that commenced by the end of 2005 has continued in 2006. Consequently, delivery precision and customer service are among the best in the industry which is strong contributor in achieving lasting and good customer relation.
