

Interim Report January–September 2002

Increased profit and growth

- Group net sales for comparable units during the first nine months of 2002 amounted to SEK 502 M (487).
- Operating profit for comparable units increased to SEK 30 M (loss: 91). The operating margin amounted to 6%.
- Cash flow from operating activities amounted to SEK 8 M (neg: 59).
- Continued good sales growth in the Video product area: up 31% compared with the year-earlier period.

About Axis: Axis develops solutions for user-friendly and secure communication over wired and wireless networks. The company is a world-wide market leader in network connectivity, with products for the office, facility and industrial environments.

Axis was founded in 1984 and is listed on the O-list (Attract 40) of Stockholmsbörsen (XSSE:AXIS). With more than 300 employees, and offices in 14 countries, Axis operates globally in cooperation with distributors and OEM partners in 70 countries. Markets outside Sweden account for more than 95 percent of sales.

Axis AB, Emdalavägen 14, SE-223 69 LUND, Sweden. Telephone +46-46 272 18 00, Fax +46-46 13 61 30, info@axis.com, www.axis.com

Restructuring and changed reporting

Axis implemented restructuring measures during the second quarter of 2001. Unless stated otherwise, the comparative data presented in the following text applies to comparable units. The aim has been to show the development of the restructured company. At the end of 2001, Axis replaced the previous division organization with a functional organization in which sales are reported by product group starting with the first quarter of 2002.

Sales

Axis' net sales for comparable units amounted to SEK 502 M (487) during the period, an increase of 3%. Net sales in the corresponding period a year earlier, including the divested company Netch were SEK 507 M. Currency effects impacted net sales negatively in the amount of SEK 7 M during the period. Sales in the third quarter, which increased by 8% compared with the year-earlier period, amounted to SEK 168 M (155).

Many markets, notably in the United States, are still characterized by an uncertain economic trend and longer decision-making processes. Despite this, Axis' sales trend has been stable. Asia is showing a marked growth in sales, due in part to large number of OEM sales. In the third quarter there was also notable sales growth in Europe where the intensification of a number of marketing activities had a positive impact on sales.

Demand for network cameras and video servers continues to increase. This trend is driven in part by a change in technology as well as increased interest in surveillance and security solutions. During the nine-month period, sales in the Video product area amounted to SEK 216 M (165), an increase of 31% compared with the first nine months of 2001. Video accounts for 44% of the company's total sales and is thus Axis' largest product area.

The Print product area, which earlier in the year showed the effects of the economic slowdown, has stabilized and reported growth of 3% in the third quarter, compared with the year-earlier period. Sales in the other product areas continue to be dampened by restrained investment interest which prevails in the IT market.

OEM sales constituted 24% (21) of Axis' total sales during the nine-month period.

Operating profit

The Group's operating profit for comparable units amounted to SEK 30 M, compared with a loss of SEK 91 M a year earlier, an improvement of SEK 121 M. The operating result for the year-earlier period, including the divested company Netch, was a loss of SEK 122 M. Profit after financial items amounted to SEK 39 M, compared with a loss of SEK 95 M in the preceding year.

The operating margin for the period was 6% (neg: 19%). Currency effects impacted profit positively in the amount of SEK 8 M during the period.

Operating profit in third quarter of 2002 amounted to SEK 12 M (1); the operating margin was 7% and the profit margin was 10%.

Cash flow and financial position

The cash flow from operating activities amounted to SEK 8 M. In order to increase efficiency and improve margins, a change pertaining to the inventory for the supply of components was implemented during the third quarter. Net investments amounted to SEK 6 M. In accordance with Recommendation RR 15 of the Swedish Financial Accounting Standards Council, SEK 4 M in development costs was capitalized during the nine-month period. Axis has liquid funds amounting to SEK 134 M and unutilized credit facilities amounting to another SEK 135 M. Accordingly, the company had disposable funds totaling SEK 269 M as at September 30, 2002.

Shareholders' equity

The Group's shareholders' equity amounts to SEK 307 M. Of the changes made during the period, SEK 31 M pertained to profit for the period, SEK 1 M to a new issue of warrants, and SEK 2 M to a change in warrants held on account. The total number of

shares at the end of the period was 68,900,000. Following the exercise of all warrants outstanding, there will be 71,421,300 shares. As at September 30, 2002, the Group's equity/assets ratio was 70%.

Business development

As has been the case earlier, the trend toward increasingly professional applications and larger investments in security and surveillance continued during the year. Axis has received, among others, two strategically important orders in France. Legrand, one of the world's leading companies in electrical installations, is selecting Axis' network cameras for a solution pertaining to remote surveillance of homes. Caisse d'Epargne, France's third-largest bank group, also chose Axis' network cameras when it approved an investment in a new security system. The order initially involved 70 of the group's bank offices and Axis expects to receive additional orders during the autumn.

The cooperation with Honeywell continued to develop during the third quarter. Axis is delivering video servers for a security system in a prison in New Zealand. The installation is the second being made jointly with Honeywell in the Pacific region in only a few months. Increased interest has also been noted in such fields as transport and logistics. Among other agreements a large number of video servers was delivered for use in remote surveillance of public transports in Naples, Italy.

Prospects for fourth quarter of 2002

The Video product area is continuing to show good growth possibilities. At the same time, sales in the other product areas continue to be affected by a cautious IT market in which few signs point to a

rapid recovery in the fourth quarter. Despite the uncertain market situation, Axis believes that the sales trend as a whole will remain stable during the rest of the year. Axis stands by its goal of having continued profitable development.

Accounting principles

The interim report was prepared in accordance with the Swedish Financial Accounting Standards Council's recommendation RR 20, Interim Reports. With the exception of capitalization of expenditures for development work, the accounting principles and methods of calculation are the same as those applied in the most recent annual report.

Parent Company

The Parent Company's operations focus primarily on administration of the Group. The Parent Company has no employees. The operating loss amounted to SEK 2 M. The Parent Company's liquid funds amounted to SEK 62 M.

¹⁾ At the end of 2001, Axis replaced the previous division organization with a functional organization in which sales are reported by product group starting with the first quarter of 2002. The tables show pro forma sales figures for 2001.

²⁾ Netch, which was previously reported in the EMEA region, is not included in the Group as of Q3, 2001.

This nine-month report has been reviewed in accordance with the recommendations issued by the FAR. A review is considerably limited in scope compared with an audit. There is nothing to indicate that this nine-month report does not comply with the requirements of the Securities and Clearing Operations Act and the Accounts Act.
