

## SAS Ground Services to take over charter handling in Aarhus

As of July 1, all passenger handling for charter companies at Aarhus Airport in Denmark will be provided by SAS Ground Services Denmark A/S (SGS Denmark). These services were previously provided by Aarhus Lufthavn A/S.

SGS Denmark's competitive prices contribute to creating better prerequisites for Danish domestic routes, thus benefiting both airlines, Aarhus Airport and passengers.

"We are pleased by this expansion of the already extensive cooperation between Aarhus Airport and the SAS Group. Our passenger handling department can now concentrate on handling passengers on the international scheduled carriers that operate from the airport, which will result in more efficient operations and cost savings," says Ole Paaske, director of Aarhus Lufthavn A/S.

"I am pleased that SAS Ground Services' offering can contribute to creating better prerequisites for further development of Aarhus Airport, while at the same time expanding our domestic business," says Bo Eklund, president of SGS Denmark.
