

## Icelandair has chosen SAS Ground Services for ground handling in Copenhagen

Icelandair has signed an agreement with SAS Ground Services Denmark (SGS Denmark) concerning ground handling at Copenhagen Airport.

The choice of SGS Denmark as full-service provider of ground handling has a number of advantages for the passengers travelling with Icelandair, such as check-in via Terminal 3 and SAS automat check-in, which will further shorten the time spend on check-in.

The contract entails three daily departures from Copenhagen to Reykjavik during the summer, and two daily departures during the coming winter. The flights will be operated by Boeing 757 aircrafts.

-The choice of SAS Ground Services Denmark is based on that they have the right match between product, service and price, says Astthor Ingason, Manager Stations, Icelandair.

-We are proud that Icelandair again has chosen SAS Ground Services Denmark as supplier of ground handling, and we are very happy to be able to offer a product that matches the customers demands in regards to price as well as quality, says Bo Eklund, President, SAS Ground Services Denmark A/S.
