Vittra

Vittra was founded in 1993 and operates in accordance with its basic idea of “augmenting chances in life during the various stages of life through education and learning”. Vittra has developed an educational model based on an individual development plan (IDP) for each pupil. This IDP consists of three, equally important, parts: personal development, knowledge, and learning to learn.

At the same time Vittra abides by clear rules of conduct based on its hallmarks of personal responsibility, difference and clarity. Vittra today is entrusted with some 7,700 pupils aged 1-19 years and has about 600 professionally skilled and dedicated employees. Vittra has 26 pre-schools, compulsory schools and high schools (upper secondary schools) in the Gothenburg and Stockholm regions and in Halland, Skåne, Småland and Östergötland.
