TeliaSonera International Carrier launches a new quality assurance feature for International Voice calls – CLI Assurance

Today, TeliaSonera International Carrier launches a new feature for international voice services, CLI Assurance, which will make it easier for mobile operators to verify the quality of service delivered for international calls.

Through this new feature mobile operators will benefit from the availability of full statistics of end-to-end CLI delivery and also guaranteed thresholds for CLI delivery to all Mobile Networks included in the CLI Assurance coverage.

CLI, Caller Line Identification, or A-number presentation is used to see where the call originates from and to get access to voice-mail and other mobile services when a person uses his mobile phone abroad. The CLI Assurance feature is designed to verify the end-to-end delivery of the CLI information and is launched to meet the requirements from leading mobile operators and the GSM Association.

“CLI Assurance will provide better Quality of Service to our wholesale and retail customers and consequently increase their revenues through higher service availability and higher answer frequency.”, said René Timmermans, VP and Head of Product & Business Management.

“The CLI Assurance feature as launched by TSIC is the most comprehensive solution on the market, with 105 Mobile Networks in 35 Countries implemented from day 1 and an aggressive road map aiming to include 500 Mobile Networks before the end of 2007.” René Timmermans continued. “This new feature to our international voice service will position TeliaSonera International Carrier as market leader for end-to-end CLI delivery verification”.

The new innovative CLI Assurance solution is developed in partnership with Ascade Telecom Software, a leading provider of telecom software and services to telecom operators.

“We are most pleased to announce TeliaSonera as subscriber to our CLI Verification Service. It is our confirm belief that TeliaSonera together with its partners will benefit greatly from the use of the service. Jointly we will pro-actively work towards an expansion of the area of coverage fulfilling our vision incorporating a majority of the world’s mobile networks” comments Henrik Anderberg, CEO of Ascade.

TeliaSonera International Carrier is the leading European provider of quality, cross-border voice, IP and capacity services. We have a 20,000 km European network and 18,000 km fiber-based trans-American . TeliaSonera International Carrier is a wholly owned subsidiary to the TeliaSonera Group.
