

# PRESS RELEASE

1 November 2006

## **Tritech and Daintree Sign Collaboration Agreement.**

**Tritech Technology AB (Tritech) and Daintree Networks, Inc (Daintree) have today confirmed their cooperation with the signing of an agreement to collaborate in the area of wireless sensor and control networking.**

The collaboration is centered on enhancing the breadth of Tritech's solutions, while at the same time expanding Daintree's market presence in Europe. Tritech will benefit from access to Daintree's solutions in a number of ways, including the ability to conduct highly effective customer proof of concept and marketing demonstrations for wireless sensor and control networking. In addition, Tritech's leadership as a complete solutions provider will be enhanced through the inclusion of Daintree's products as part of the portfolio. Tritech is able to deliver total solutions where Daintree's analysis tools are one of many components.

As WPAN (Wireless Personal Area Network) technology grows to enable large scale networks with hundreds or even thousands of nodes, it is necessary to have the ability to maintain and analyze the underlying communication protocol. Daintree's Sensor Network Analyzer enables this to be accomplished with minimal effort.

Tritech uses and recommends Daintree's Sensor Network Analyzer. "Through the use of Daintree's analysis solutions, Tritech is able to quickly communicate with customers during proof of concept and actual solutions development" said Mattias Wide, Regional Manager, Tritech.

Tritech's extensive and ongoing experience helps Daintree to continuously improve Daintree's analysis solutions. "Tritech's extensive development and field experience with ZigBee and 802.15.4 makes them a world leader in their field, and one Daintree is proud to collaborate with" said Bill Wood, President, Daintree Networks.

### **ZigBee: Wireless Control That Simply Works**

The ZigBee Alliance is an association of companies working together to enable reliable, cost effective, low-power, wirelessly networked, monitoring and control products based on an open global standard. The ZigBee Alliance membership comprises technology providers and original equipment manufacturers worldwide. Membership is open to all. Additional information can be found at [www.zigbee.org](http://www.zigbee.org).

#### **About Trittech Technology AB**

Trittech Technology AB is a comprehensive supplier of qualified services for electronic product development, maintenance and manufacturing. We help our customers increase their profitability by delivering highly skilled technical competence, efficient working procedures and creativity. We are approximately 150 employees with offices in Stockholm, Västerås, Linköping and Örebro. **We turn technology into business.**

#### **About Daintree Networks, Inc**

Based in San Jose, California, Daintree Networks is a leading provider of design verification and operational support tools for wireless sensor and control networks. In a rapidly evolving industry, accelerated development and deployment cycles are key to market success. Our professional tools help OEMs, system integrators and installers of wireless sensor and control networks speed their time to market. As an active member of the ZigBee™ Alliance, the company is playing a vital role in bringing the first wave of interoperable standards-based sensing and control products to market. For more information, visit [www.daintree.net](http://www.daintree.net).
