

## SAS Ground Services starts full ground handling at Aberdeen Airport

SAS Ground Services UK now establishes its own ground handling organization at Aberdeen Airport. The new set-up includes passenger handling, ramp services and de-icing.

"We recently added a ramp organization to our passenger handling at London Heathrow," says Christer Svensson, Managing Director for SAS Ground Services UK. "This is a continuation of our expansion plans in the UK market. We will initially provide handling to the SAS Group companies, but we are convinced that we will attract other customers during the spring."
