

Merger of Cell Network and Mandator proceeding according to plan

The merger process between Cell Network and Mandator is continuing as planned. Negotiations with Germany's Pixelpark do not affect the integration program.

"Work in creating the new Cell Network is continuing with full force," says Marcus Bäcklund, president of Cell Network AB. "The integration process has been in progress since February and will be completed by autumn, at which time we will have a joint offering and be able to fully exploit the expertise of both companies in customer projects."

"There are already projects in several countries in which consultants from Cell Network and Mandator are working together," adds Mandator's president Niklas Flyborg.

The notification period for shareholders in Cell Networks for accepting the offer to exchange their shares for Mandator shares expires on April 17.
