Mandator and MediTelligence are co-operating in the development of wireless solutions for the healthcare industry

Mandator and MediTelligence are co-ordinating their expertise to create total solutions for healthcare services. Mandator is not only responsible for installation, but also offers consultancy services relating to the mobile units intended for use in public healthcare – an area in which MediTelligence specialises.

Jointly, through their collaboration, Mandator and MediTelligence are able to offer wide-ranging, top-quality expertise in the provision of effective, total solutions for portable and wireless systems in the healthcare sector.

MediTelligence has developed a range of applications for healthcare services and the pharmaceutical industry. The applications can be used on laptops or WAP telephones, either direct or via the Internet. Doctors and other medical personnel can simply enter the patient's details into the unit instantly at the scene. The information is then transmitted by radio to the hospital's records system, to colleagues or to the next unit in the healthcare chain. The information can also be linked up to financial systems, patient booking-in systems and much more. As well as offering advice and other associated services, Mandator is responsible for the installation of the system.

"Because we do not have the resources ourselves to supply the global market, it is essential that Mandator enjoys a wide geographical presence to enable our products to achieve broad market coverage. Mandator is also extremely committed to the healthcare sector and has many resources. This strengthens and consolidates our co-operation, resulting in favourable solutions for our customers", points out Mikael Leinsköld, MD at MediTelligence.
