Apptus releases new Theca version

Lund, 14 June 2007
Apptus Technologies, an emerging leader in specialized data management
and search technology, has released Theca 1.3, a software platform for
structured and unstructured information that enhances existing enterprise
applications and allows rapid creation of specialized high-performance
information systems.

The technology includes significant new features that focus on rapid and
accurate implementation, easier deployment, higher availability and easier
administration as well as new functionality for data enrichment purposes, such
as classification, data cleansing and accurate keying.

The Theca platform include a best-of-breed online transaction processing
database and is designed to help businesses better leverage their existing
information assets to thrive in today's on demand business environment.
