AU-SYSTEM TO BUILD INTERNET SERVICE FOR JOBSEEKERS IN EUROPE

Stockholm, Sweden - October 5, 2000 - AU-System, a leading Mobile Internet consultancy, has been commissioned by the Swedish National Labour Market Board (AMS) to build the European CV database that AMS is developing for the EU Commission; the European Jobseekers Database (EJD).

The purpose of the European Jobseekers Database is that jobseekers looking for employment in other EU countries will have the opportunity to put their CV on a web site, and that employers will have the opportunity of gaining access to these CVs. The structure of the EJD web site will be based on existing solutions developed by AU-System for AMS.

"We see it as an illustration of great trust to build the European Jobseekers Database," says Johan Nyberg Business Unit Manager at AU-System. "It is a good testimonial for AMS as a leading European content provider and for AU-System as a supplier of leading-edge technical expertise."

The AMS website is one of Sweden's most often visited sites, and in a survey carried out by Internet World magazine, it was ranked among the five best websites in Sweden in the year 2000.
