## **New LyngBox web based Favourite Lists Tool**

### ***Linköping, November 4, 2008 - LyngBox Media AB releases new web functionality***

Since sales started in February 2008, **LyngBox LB-1** has created a lot of attention with a new concept of combining HD satellite and terrestrial receivers with extended Internet services.

**LyngBox LB-1** offers complete access to the information on [LyngSat Network](http://www.lyngsat.com) ([www.lyngsat.com](http://www.lyngsat.com)) which enables easy installation, upgrades and extended services like web based remote recordings and Internet EPG.

Continuing the path of integrating more services, LyngBox Media now releases a web based **Favourite Lists Tool** that allows the user to create favourite lists directly on our website for automatic and immediate transfer to the box at home.

The new service can be found on [LyngBox.com](http://www.lyngbox.com) ([www.lyngbox.com](http://www.lyngbox.com)) under the section "**Favourite Lists**". To access, you will need to log in as a LyngBox user and enter your LyngBox ID and password in the settings (your unique username and password can be found in the **System Information** of the LyngBox).

Once the system recognizes your LyngBox, based on your specific settings, the web tool allows you to create up to 10 favourite lists from the satellites available to your box.

Detailed information on how to use the Favourite Lists Tool is published in the user manual at [www.lyngbox.com/support/manual/](http://www.lyngbox.com/support/manual/)

### **About LyngBox Media**

LyngBox Media is a Swedish company formed specifically to develop and bring to market the LyngBox - an advanced HDTV receiver/recorder for satellite and terrestrial digital transmissions. What makes the LyngBox unique and easy to operate, is the exclusive integration with LyngSat Network - today the biggest independent source of satellite and channel data. The LyngSat Network has earned the recognition for being the number one source of reliable and up-to-date satellite and technical information; the web portal has more than 18 million visits per month.

The result of the close cooperation between LyngSat Network, ESA (European Space Agency) and LyngBox Media is a set-top box with an unparalleled simplicity in accessing and continuously upgrading the enormous selection of available satellite channels. The concept, design and production of LyngBox are Swedish from start to finish.
