

Press Release, 27 October 2000

Euroseek Access installs broadband on Ekerö

The Internet service Euroseek has completed a broadband installation for Ekerö Bostäder, Sweden, providing 700 apartments with the opportunity to have fixed Internet connections at up to 2 Mbit per second.

Euroseek Access has used a combination of fibres, copper wires and radio links.

“Our concept is to use the technology that does the job best on the basis of customer prerequisites, geographical location and preferences,” explains Catherine Sahlgren, CEO of Euroseek.

“The solution enables people owning laptop computers to move freely within the area, both indoors and outdoors, without trailing cables behind them, and still be connected to the high-speed Internet,” says Mats Lenné, Vice Chairman of Ekerö Bostäder.
