

Interim Report

THE SAS GROUP

www.scandinavian.net

SAS DANMARK A/S

SAS NORGE ASA

SAS SVERIGE AB

January – September 2000

- The SAS Group's income before taxes was MSEK 1,060 (601). Income for the third quarter amounted to MSEK 328 (105).
- Income excluding capital gains amounted to MSEK 780 (-9) for the nine-month period and MSEK 337 (-72) in the third quarter.
- Passenger traffic (RPK) increased by 7.6%. Traffic in Business Class rose 7.0%.
- Increased fuel costs had a negative impact on earnings of MSEK 1,091 compared with the same period in the previous year. The business improvement program is progressing according to plan which led to a 3.2% reduction in the unit cost, excluding the higher fuel costs.
- Cash flow from operations amounted to MSEK 1,728 (1,149).
- Earnings per share amounted to SEK 4.93 (3.20) for SAS Danmark A/S, SEK 4.67 (2.98) for SAS Norge ASA, and SEK 4.95 (3.19) for SAS Sverige AB.
- SAS's parent companies report the following income after taxes:

SAS Danmark A/S	MDKK	206	(126)
SAS Norge ASA	MNOK	213	(132)
SAS Sverige AB	MSEK	349	(225)
- The Board adheres to its previous forecast for the full year 2000 of income before taxes, excluding capital gains, of approximately MSEK 1,000.

This interim report has not been reviewed by the Company's auditors.
The complete report can be accessed on www.scandinavian.net

IMPORTANT EVENTS IN THE LAST THREE QUARTERS

FIRST QUARTER 2000

- SAS launched a WAP service for ticket reservations and information via mobile telephones.
- SAS was ranked best domestic airline in Norway and received the “Grand Travel Award.”
- SAS EuroBonus won the “Freddie Award” for the fourth consecutive year.
- SAS decided to buy 12 Airbus A321s and options for a total of SEK 4.5 billion. These aircraft meet high standards as regards low fuel consumption and noise levels and raise SAS’s transport capacity to/from several major European cities and between the three Scandinavian capitals.
- SAS Cargo, Lufthansa Cargo and Singapore Airlines intensified their partnership plans in the freight sector.
- SAS, British Midland and Lufthansa concluded a joint venture agreement regarding European traffic to/from London Heathrow and Manchester.
- Star Alliance™ was broadened to incorporate two more members, Singapore Airlines and Austrian Airlines Group.
- SAS signed an agreement with Sabre, the world leader in advanced IT solutions for the travel and transport industry, regarding wider distribution of SAS’s products and services.

SECOND QUARTER 2000

- SAS tested Digital TV in interactive communication with customers.
- British Midland and Mexicana Airlines became new members of the Star Alliance™.
- SAS launched timetable information via SMS.
- SAS International Hotels (SIH) sold the Radisson SAS Scandinavia Hotel property in Oslo.

THIRD QUARTER 2000

- In cooperation with twelve other airlines, SAS set up the airline industry’s largest Internet-based marketplace for business-to-business commerce, Aeroxchange.
- The members of the Star Alliance™ launched StarNet, a sophisticated IT solution that links the 15 airlines’ computer systems with each other, which will benefit integration of the traffic systems.
- SIH concluded an agreement to operate the Malmaison hotels and acquired the Malmaison brand together with its partner.

IMPORTANT EVENTS AFTER SEPTEMBER 30, 2000

- SAS, Amadeus and Netcom launched a new Internet-based travel marketplace with the aim of achieving a leading position in Scandinavia.
- In October, SIH sold the Radisson SAS Düsseldorf Hotel property for MSEK 300, corresponding to its book value. The hotel will continue to be operated under a long-term management agreement.
- SAS’s winter traffic program represents international expansion.
- The three Scandinavian governments have jointly announced their intention to reorganize SAS’s share structure to one share in a holding company.

THE SAS GROUP

SUMMARY STATEMENT OF INCOME

(MSEK)	JULY-SEPTEMBER 2000 1999		JANUARY-SEPTEMBER 2000 1999		OCTOBER-SEPTEMBER 1999-00 1998-99

DEVELOPMENT OF MARKET-BASED RETURN ON CAPITAL EMPLOYED, ROCE (%) *

The SAS Group's market-based ROCE was 19% for the period October 1999 - September 2000, calculated on a market-based EBIT of MSEK 5,581 in relation to average capital employed, which includes the market values of the aircraft fleet and the present value of operating lease contracts. The increase in ROCE is largely due to the substantial rise in the surplus value of aircraft which is an effect of the high dollar rate. After deduction for capital gains from the sale of shares amounting to MSEK 207 and the sale of hotel properties amounting to MSEK 243, the operation's market-based EBIT was MSEK 5,131. Operating activities thus provided a return of 17.9% which is 5.9 percentage points higher than the minimum requirement.

* 12-month rolling values

DEVELOPMENT OF CASH FLOW RETURN ON INVESTMENTS, CFROI (%) *

CFROI expresses the return generated by operations in the form of operating cash flow, excluding capital gains, as a ratio of market-adjusted capital employed. CFROI for the period October 1999 – September 2000 was 16%. The minimum return requirement is 17%.

* 12-month rolling values

THE SAS GROUP

MARKET AND COMPETITION

The business trend in the markets in which SAS operates remains positive and economic growth is expected to continue to increase in the medium term. Economic forecasters expect that the strong growth in the U.S. economy will decline to some extent, that the Japanese economy will continue its recovery although still at a slow rate, and that the economic situation in Europe will continue to improve. Scandinavia is showing positive development, particularly Sweden where the strong economic growth continues and inflation and interest rates are at a low level, which favors travel.

In addition to changes in GNP, the development of air services depends on ticket prices, competition and capacity. The positive traffic trend in the first nine months of the year, combined with a very modest capacity increase, provided SAS with a four percentage points higher cabin factor than in the same period in the previous year and consequently higher passenger revenues. Competition remains intense and is increasingly characterized by the ability, within the framework of the major alliances, to create optimal traffic systems which offer customers the most appropriate service and raise cost efficiency by taking advantage of synergy gains. While competing product offers and budget operators are putting pressure on fares, the airline industry must try to compensate for the dramatically rising costs of aircraft fuel. The average fuel price has risen 85% since September 1999. SAS's fuel costs rose SEK 1,091 or 68% compared with the period January-September in the previous year.

In general, SAS defends its position in the air travel market between Scandinavia and the rest of the world, traffic which is expected to rise by approximately 5% in the present year. On the major European routes SAS is winning shares in Business Class. On the intercontinental routes, in particular to and from the U.S., the cabin factor is very high which leads to a loss in market share. Deliveries of the new Airbus fleet due to start in 2001 will improve SAS's opportunities to gain a greater advantage from the traffic growth on European and intercontinental routes, to recapture the market shares lost through lack of capacity, and to attract new customers.

FINANCIAL DEVELOPMENT

Currency Effects

Income in January-September was affected by a negative currency effect of MSEK 7. In the third quarter the net effect was MSEK -33. This negative currency effect mainly arose on the net debt due to the weakening of the Swedish krona against the euro, the U.S. dollar and other currencies to which the net debt is exposed.

Third Quarter 2000

Operating revenue amounted to MSEK 11,263 (10,019) in the third quarter, an increase of 12.4%.

Operating expenses rose by MSEK 757 or 8%. Higher fuel costs accounted for MSEK 379.

Net financial items amounted to MSEK –190 (-96) in the third quarter. Net interest was MSEK –80 (-46) due to the rising net debt.

The currency effect during the quarter was MSEK -101 (-41) due to a strong U.S. dollar and a weak Swedish krona.

Income before capital gains amounted to MSEK 337 (-72).

Income from the sale of fixed assets amounted to MSEK –9 (177). In the third quarter of this year a sale and leaseback transaction was carried out with two Boeing 737s and shares in group companies were sold. The entire costs relating to phasing out aircraft in the period January-September reduced capital gains in the third quarter.

Income before taxes amounted to MSEK 328 (105).

January-September

The SAS Group's operating revenue amounted to MSEK 33,367 (30,984), an increase of MSEK 2,383 or 7.7%. MSEK 2,075 of this increase was higher passenger revenue and MSEK 308 increased operating revenue in other business areas. SAS's passenger traffic measured in RPK, Revenue Passenger Kilometers, increased by 7.6% compared with the same period in 1999. Unit revenue, yield, rose 1.4%. Adjusted for currency effects, the increase was 0.9%.

Operating expenses rose MSEK 1,650 or 5.6%. Increased fuel costs accounted for MSEK 1,091 of this amount. Operating income before depreciation increased by MSEK 733 or 48% and amounted to MSEK 2,256 (1,523). The gross profit margin increased from 4.9% to 6.8%.

Share of income before taxes in affiliated companies amounted to MSEK 74 (102). Amortization of goodwill is included in a total amount of MSEK 30 (31).

Capital gains totaled MSEK 280 (610).

During the period aircraft transactions, including phase-out costs, generated capital gains of MSEK 9 and the sale of a hotel property and other shares provided MSEK 271.

The SAS Group's net financial items amounted to MSEK –195 (-167). Net interest was MSEK –132 (-147). The currency effect was MSEK –38 (-22), due to the weak development of the Swedish krona in the third quarter against the currencies to which the SAS Group's net debt is exposed.

Income before taxes amounted to MSEK 1,060 (601). The change in income before taxes is due to:

Currency effect	-7
Operating income before depreciation	724
Depreciation, share of income, etc.	72
Capital gains	<u>-330</u>
	459

INVESTMENTS

The SAS Group's investments, including prepayments, amounted to MSEK 7,187 (4,237) during the period. The airline operations accounted for MSEK 6,998 (4,136) of investments and SAS International Hotels for MSEK 188 (101). Investments in aircraft and other flight equipment amounted to MSEK 6,357 (3,410). This includes investment in 15 Boeing 737s and ten deHavilland Q400s. Delays at the manufacturer, Bombardier, resulted in deliveries of five deHavilland Q400s being rescheduled from 2000 to 2001.

At the end of September 2000, the value of orders for Boeing 737s, deHavilland Q400s, Airbus A340/330s and Airbus A321s totaled MUSD 2,300.

Firm orders for aircraft during the period 2000-2003>:

	Total	2000 OCT. – DEC.	2001	2002	2003>
MUSD	2,300	200	900	800	400
NUMBER OF AIRCRAFT	51	7	25	13	6

Other investments normally amount to MSEK 800-900 on a yearly basis.

FINANCIAL POSITION

The SAS Group's liquid assets amounted to MSEK 7,047 (5,782) on September 30, 2000. Cash flow from operations in the first nine months of the year amounted to MSEK 1,728 (1,149). The net sum of investments and sales of fixed assets amounted to MSEK -4,871 (-2,359). The financing deficit for the period was MSEK -4,025 (-3,413).

The equity/assets ratio on September 30, 2000, was 39% (40%) and the debt/equity ratio was 0.26 (0.33). The net debt amounted to MSEK 4,704, an increase of MSEK 4,030 since year-end 1999. This increase is mainly attributable to prepayments and delivery payments for new aircraft.

The estimated surplus value of the aircraft fleet owned by SAS was approximately MSEK 6,700 (4,500) on September 30, 2000.

PERSONNEL

The average number of employees at the SAS Group during the period was 28,485 (27,773), of whom 25,345 (24,675) at SAS and 3,099 (3,057) at SAS International Hotels.

SAS GROUP INCOME BEFORE TAXES

SAS GROUP CASH FLOW AND INVESTMENTS

SAS

Airline Operations

Market and Competition

The market for airline services between Scandinavia and the rest of the world is expected to rise by approximately 5% for the present year.

The market for air services to/from Sweden is rising sharply, 7-8% during the year, while the trend in the Danish market is positive but weaker. For traffic to/from Norway, volume for scheduled flights is expected to be unchanged compared with the previous year.

The increase noted for SAS's passenger traffic at Kastrup is mainly attributable to development in the Swedish market since the rate of increase in the Danish market is lower. In Norway, the market in Oslo is growing while the rest of the market is decreasing.

In general, SAS is defending its market position in traffic between Scandinavia and the rest of the world. Some strengthening was noted in certain areas, particularly in the latter part of the period. In the Swedish market, SAS strengthened its position. SAS increased its proportion of Business Class on the major European routes.

In the Danish market, SAS recaptured market shares towards the end of the period thus breaking the negative trend. In south Jutland, however, Billund is gaining importance as an international airport through Maersk's services to other hubs.

In the Norwegian market it can be noted that the previous negative trend in the development of SAS's market share was reversed in recent months.

In general, Economy Class is rising faster than Business Class in all Scandinavian markets.

As regards the competitive situation in terms of seat availability and frequencies, the trend in the present year is comparatively balanced. SAS has largely maintained its production shares in the offering between Scandinavia and Europe.

SAS's total passenger traffic rose 7.6% compared with the period January-September in the previous year. In the period July-September, traffic rose 8.6%. The total traffic growth for SAS and the regional and European partners in which SAS holds significant stakes was approximately 11% in the first nine months of the year.

Development for Business Class traffic remained positive and increased by 7% compared with January-September in the previous year. Business Class accounted for 28.2% of total RPK, an increase of 1 percentage point compared with the previous year. Traffic in Economy Class rose 7.8% compared with 1999. The cabin factor increased by 4.1 percentage points to 68%. In the third quarter, the cabin factor rose 5.3 percentage points to 72.4%. Yield increased by 1.4% compared with 1999. Adjusted for currency effects, yield rose 0.9%.

Intercontinental traffic rose 8.3% compared with the previous year. Business Class traffic increased by 9% and Economy Class by 8%. The cabin factor on intercontinental routes was 81.4% (74.9%), an increase of 6.5 percentage points. In the third quarter, the cabin factor was over 90% at times. The development of traffic to/from Chicago, Seattle and Beijing was particularly positive. The cabin factor on routes to Tokyo and Bangkok was over 85%. SAS is restricted in intercontinental traffic by the meager seat capacity of the Boeing fleet.

In the period January-September, air traffic within the Association of European Airlines, AEA, increased by 8% in Europe. SAS's traffic in Europe, including intra-Scandinavian traffic, increased by 6.6%. The AEA companies increased their production in Europe by 5.7% while SAS increased by 1.2%.

Traffic on European routes increased by 7.3%. Both Business Class traffic and Economy Class rose 7%. The cabin factor was 2.9 percentage points higher than in the same period in 1999. Production increased by 2.3%. Particularly favorable development was noted for traffic to/from Scandinavia, Germany and Finland. Starting with its 2000/2001 winter program, SAS is putting additional capacity into European traffic while introducing new routes to Birmingham and Palma de Mallorca.

Intra-Scandinavian traffic increased by 3.5%. Business Class traffic rose 4% and Economy Class 3%. The occupancy rate increased by 3.9 percentage points to 61.2%. Production was decreased by 3%. In the third quarter, traffic growth was a full 7.2% which led to lack of capacity during peak traffic periods, mainly to/from Copenhagen where capacity has now been steadily strengthened. The catamaran route between Malmö and Copenhagen was discontinued at the end of August.

In the Swedish domestic market, SAS and its partners increased their market share during the period. The total market increased by 5% and SAS's traffic was up 16% over the previous year. In July, the traffic increase was more than 20%. The increase in Business Class was 13% and in Economy Class 18%. Capacity rose 14.4% measured in ASK following the introduction of Boeing 737s and the cabin factor was 65.2% (64.4%).

The Norwegian domestic market decreased by 2% during the period. Fare increases and high state charges are subduing demand for air travel. Business Class traffic increased by 1%, Economy Class by 3% and SAS's total traffic by 2.4%. Production was 6.1% lower than in the same period a year ago. The cabin factor was 57.9% which is 4.8 percentage points higher than in 1999. SAS's market share of routes exposed to competition rose by 2 percentage points.

Danish domestic traffic decreased in Business Class by 12.5% and increased in Economy Class by 3.7%. Total traffic was 3.6% lower than in the previous year. In the third quarter, traffic to Greenland developed well while traffic on the Danish mainland stabilized to the previous year's level.

The number of passengers in the period January–September was 17.5 million (16.5). The number of members of SAS EuroBonus was 16% higher than on September 30, 1999, and amounted to 2.02 million on September 30, 2000. Of SAS's total ticket sales, 9% or more than MSEK 2,000 were made through electronic channels.

Freight Operations

Freight revenue for the period totaled MSEK 1,771 (1,668), representing an increase of approximately 6%. Also in volume (tonne-km) SAS Cargo increased by 6%, thus breaking the yield decline of recent years. Demand for air freight was strong during the period. However, demand from the U.S. fell, mainly due to an imbalance in trade between Europe and the U.S. due to the strong dollar. European routes are exposed to increasingly strong competition from integrators and ever-improving trucking solutions, which led to a decline in volume of approximately 9% compared with the same period in 1999. In order to counteract this negative trend, SAS Cargo is focusing on changing the product mix in Europe so that the proportion of express consignments will rise which should compensate for the falling tonnage.

As part of SAS Cargo's quality work the terminals in Stockholm, Gothenburg, Oslo and Copenhagen have started ISO 9002 certification. Stockholm, Gothenburg and Oslo are expected to be ready before the end of the year and Copenhagen is expected to achieve ISO certification in the first quarter of 2001.

Income Trend

Operating income from the airline operations showed positive development, despite the substantial fuel price increase and the weak Swedish krona, due to stronger traffic and revenue trends, better capacity utilization and a positive trend for the unit cost.

Operating income before depreciation and leasing costs amounted to MSEK 1,324 (753) in the third quarter, an increase of 76%. Capacity utilization in the traffic system increased compared with the third quarter of 1999 by 5.3 percentage points to 72.4%. Yield rose 3.8%. Adjusted for currency effects, yield increased by 2.9% compared with the third quarter of the previous year.

Operating income before depreciation and leasing costs for the period January–September amounted to MSEK 3,105 (2,240), an increase of 39%.

Production increased by 1.1% during the nine-month period. A capacity increase of approximately 2% is expected for the full year 2000.

Operating expenses rose during the period by MSEK 1,394 or 5.2%, of which increased fuel costs accounted for MSEK 1,091.

In the period January–September the unit cost adjusted for currency effects increased by 0.6%. Excluding the fuel price increase, the unit cost fell by 3.2%.

The price of aircraft fuel in Europe, where SAS consumes the greater part of its fuel, was 85% higher in the period January-September this year than in the same period last year. Since SAS hedges part of its anticipated consumption on a rolling 12-month basis, a significant part of the fuel price rise could be avoided. SAS's fuel costs increased by 68% compared with the same period last year. Of this, the increased price of fuel accounts for 56 percentage points and volume and currency effects total 12 percentage points. The increased cost of fuel had a negative impact on the unit cost of 3.8%.

An insufficient buildup of stocks of crude oil and refined products, mainly heating oil, combined with the situation on the West Bank and the approaching winter, make a stable, high oil price very probable over the next six months.

Payroll expenses were at the previous year's level, MSEK 9,903 (9,843). Productivity improved by 1.7%.

At the end of September 2000, cost reductions of MSEK 2,150 on an annual basis had been achieved within the framework of SAS's business improvement program.

One Fokker F-28 was sold in March. In June, a sale and leaseback transaction was carried out with one Boeing 737 and in September with two Boeing 737s. During the period, 15 Boeing 737s and ten deHavilland Q400s went into operation, of which five and four respectively in the third quarter.

Income before capital gains was MSEK 524 which represents an MSEK 664 improvement over 1999.

SAS INTERNATIONAL HOTELS (SIH)

The hotel market showed very positive development in the first nine months of the year in most markets in which SAS International Hotels (SIH) operates hotels. In key destinations such as London, Amsterdam and Stockholm, demand for hotel rooms remained very high which resulted in occupancy rates well over 90%. The only markets with negative development in 2000 are a few locations in Norway, where the supply of hotel rooms increased and demand decreased.

Revenues for the period totaled MSEK 2,269 (2,160), an increase of approximately 5%.

During the period, twelve new agreements were signed in the Radisson SAS Hotels & Resorts (RSH) chain. The hotel locations include Bahrain, Sofia, Warsaw and Cape Town.

SIH has acquired the brand and rights to Malmaison hotels. A joint venture, in which SIH's stake is 50%, has been formed with Marylebone Warwick Balfour Group Plc. (MWB). The intention is to develop this brand further in Europe in the next few years. At present, five hotels are in operation and two are under construction, all located in the U.K. The hotels in the chain will be operated by SIH under a long-term management agreement.

The Radisson SAS Scandinavia Hotel Oslo property was sold in May, which provided a capital gain of MSEK 243. SIH will continue to operate the hotel under a long-term management agreement.

Income before taxes for the nine-month period amounted to MSEK 487 (420).

FORECAST FOR THE FULL YEAR 2000

The positive development of SAS's operations continues with good growth in passenger traffic in both the business and leisure travel segments.

The historically high fuel costs are a burden, however, and are now expected to lead to a cost for the full year 2000 of approximately MSEK 3,700. This represents increased fuel costs of approximately MSEK 1,500 compared with the previous year.

Despite this, the Board adheres to its previous forecast of income before taxes, excluding capital gains, of approximately MSEK 1,000.

Accounting Principles

The SAS Consortium and the SAS Commuter Consortium report according to IAS which implies that subsidiaries and affiliated companies are reported according to the equity method, whereby income and shareholders' equity in the SAS Group on the one hand, and in the SAS Consortium and the SAS Commuter Consortium on the other hand, correspond to each other.

Taxes pertain to both actual tax expenses and to the change in deferred tax, while negative tax refers to corresponding items reported earlier as tax payables, alternatively tax receivables, the latter to be offset against taxes on future profits.
