

## CARDO WINS ORDER FOR DOOR AND DOCKING SOLUTIONS IN ITALY WORTH SEK 4.3 MILLION

---

One of Italy's largest retail chains is selecting door and docking solutions from Cardo's division Door & Logistics Solutions. The contract comprises supply, installation and ongoing service of more than 80 complete docking stations for a new logistics center near Catania in Italy. The order is worth SEK 4.3 million and final delivery is expected to occur in November 2009.

Through Door & Logistics Solutions, Cardo is one of the world's leading suppliers of doors and docking solutions to companies in the fields of transportation, logistics, manufacturing and retail. The division has around 1,000 service engineers, and service accounts for 44 percent of the division's total sales. In recent years, the division has developed products that include monitoring systems for more efficient management of the logistics of distribution centers. The division also offers solutions that help reduce energy consumption in a logistics center by up to 30 percent.

"I see the order as proof that our focus on service is right. The groupwide service contract we already had with the customer, along with our ability to deliver and install for projects of this size, was decisive in our winning the order," says Peter Aru, Cardo's President and CEO.

The order will be booked during the first quarter.

Malmö, Sweden, April 15 2009
