Telia awarded UMTS-license in Norway

The Norwegian NPTA today awarded NetCom ASA, part of the Telia Group, one of four UMTS-licenses in Norway.

"We're very pleased to be awarded an UMTS-license in Norway since this follows Telia's Nordic strategy, says Kenneth Karlberg, Senior Executive Vice President, Telia AB. Our Norwegian UMTS-strategy is offensive with broad coverage and fast build-up."

Telia now have UMTS-licenses in both Norway and Finland and have also applied for a license in Sweden. Telia now continues the offensive concentration at the Nordic market where the company is the largest mobile operator with over 4,3 million mobile customers.
