

CARDO WINS ORDER FOR COMPRESSORS FOR TREATMENT PLANT IN SWITZERLAND

Cardo's division Wastewater Technology Solutions will be supplying compressors for one of the biggest treatment plants in Switzerland as of September 2009. The order is worth EUR 1.2 million.

As the population increases and the burden on wastewater systems grows, renovation and upgrades are needed. In order to improve the efficiency of the biological treatment process at the treatment plant, a number of compressors from Cardo's division Wastewater Technology Solutions with its corporate brand ABS will be installed. The compressors supply air in the tanks for biological treatment, creating optimal conditions for a more environmentally friendly biological treatment of the wastewater while keeping costs down.

The order will be booked during the second quarter.

Malmö, Sweden, June 26 2009
Cardo AB (publ)
