# IAR Systems delivers complete starter kit for low-power STM32L family

Uppsala, Sweden—May 18, 2011—IAR Systems today announces a new kit for STMicroelectronics' ARM Cortex-M3 based STM32L family with all necessary hardware and software for evaluation and prototyping included. IAR KickStart Kit for STM32L includes an evaluation board featuring an STM32L152VB microcontroller, LCD and other peripherals, an IAR J-Link Lite debug probe providing JTAG and SWD connections to the board, and a CD with software tools, example projects, and board support packages for different RTOSes.

The STM32L family is designed for low-power applications. When the board is connected to an IAR J-Link Ultra debug probe (sold separately), IAR Systems' innovative power debugging technology will be enabled. Power debugging allows users to tune and optimize software applications to control the hardware in a fashion that consumes a minimum of power.

IAR KickStart Kit for STM32L is in stock and available in IAR Systems e-shop: [www.iar.com/eshop](http://www.iar.com/eshop) . It is priced at EUR 139/USD 199. The part number is KSK-STM32L152VB.

More information is available at [www.iar.com/kits](http://www.iar.com/kits).

**About IAR Systems**

IAR Systems is the world's leading supplier of software tools for developing embedded systems applications. The software enables over 14 000 large and small companies to develop premium products based on 8-, 16-, and 32-bit microcontrollers, mainly in the areas of industrial automation, medical devices, consumer electronics, telecommunication and automotive products. IAR Systems has an extensive network of partners and cooperates with the world's leading semiconductor vendors. IAR Systems is listed on NASDAQ OMX Stockholm via its owner Intoi AB. Intoi AB is being renamed IAR Systems Group. When the amendment is registered with the Companies Registration Office, the company's ticker symbol on the NASDAQ OMX will become IAR.
