Uppsala September 8, 2011

Following Biotage's request for re-examination US Patent and Trademark Office has rejected all claims in US patent 7,410,571

A lawsuit was filed against Biotage by Scientific Plastic Products, Inc. concerning alleged infringement of the US patents no 7,138,061, 7,381,327 and 7,410,571.

Biotage then filed an application to the US Patent and Trademark Office applying for re-examination of all patent claims in the three patents mentioned above. At the same time Biotage submitted a request to stay the lawsuit in the district court pending the outcome of the re-examination proceedings. The court approved Biotage's request and declared the district court lawsuit stayed until resolution of the reexamination proceedings.

The US Patent and Trademark Office have now also declared all claims of US patent 7,410,571 rejected. It is possible to file a notice of appeal.

Biotage earlier this year published that the US Patent and Trademark Office had declared all claims of US patent 7,381,327 and 7,138,061 rejected. Notices of appeal have been filed by Scientific Plastic Products.

"The decision of the US Patent and Trademark Office once again confirms our assessment of the legal situation. We have all the way claimed that the plaintiff did not have good cause for the alleged patent infringement.", says Torben Jørgensen, CEO, Biotage AB.

The information in this press release is of the kind that Biotage AB (publ) may be required to make public according to the Securities Market Act and/or Financial Instruments Trading Act. The information was released for publication at 9am on September 8, 2011.
