

## Sogeti launches free iOS and Android software testing lifecycle app: TMap® Life Cycle

*- New free mobile app places more than 25 years of software testing and Quality Assurance expertise into the hands of Sogeti customers*

**Paris, France, 26 January, 2012** – Sogeti, a leading provider of professional technology services, specializing in Application Management, Infrastructure Management, High-Tech Engineering and Testing, has launched a new free app for iOS and Android - the TMap® Life Cycle.

Sogeti's TMap® is the world-leading methodology for structured risk-based software testing. An essential element of TMap® is the lifecycle, covering the key steps in testing strategy and execution, in the end to end process to achieving robust business-critical applications.

Sogeti's TMap® Life Cycle app provides this mobile-based framework with just a few clicks to a Smart phone or tablet - to guide software testers through the software testing lifecycle, from planning, infrastructure, control and all stages of a software testing project's critical paths. Using TMap®'s defined structured framework for end-to-end test process, this app helps testing professionals track the progress of their projects and enable the earlier identification of defects, consistent reduction of timelines by at least 30 percent and lower overall costs.

The new app is available now in the Android marketplace and App Store. It is compatible with Android mobile devices as well as Apple's iPhone, iPod Touch and iPads. It provides users with free downloads to support the TMap® process, including checklists and templates. The app also includes videos explaining test design techniques, product risk analysis and methods to determine test strategy, as well as links to software testing resources such as eBooks and white papers.

Nijs Blokland, VP, Global Service Line Testing for Sogeti explains: "TMap® is a sophisticated, proven and trusted software test management methodology, relied upon by tens of thousands of software testers across the globe for structured risk-based testing. At Sogeti we want to make structured software testing and quality assurance methods easily available to professional testers, so it was a logical extension for us to build and share this free app."

Andrea van den Bosch, Functional Application Manager SR Leven at early-adopter Dutch Insurance company De Goudse Verzekeringen, adds: "The TMap® Life Cycle app is a really smooth-running app that's a great addition to the TMap NEXT® book. It's very helpful and practical to always have the necessary information in your hand. Long story short: a great app that Sogeti can be proud of!"

To download this free app, go to the App Store or Android Market, and search for TMap® Life Cycle.

### **About TMap®**

TMap® (Test Management Approach) is Sogeti's business-driven, risk-based methodology for structured software testing, relevant to organizations of all sizes and vertical markets. An adaptive method, suitable for all test situations in development environments, including new development, maintenance, waterfall/iterative/agile development, customized or packaged software, TMap® addresses the key issues of quality, time and cost across the development lifecycle. The app describes different phases of the TMap® lifecycle.

### **About Sogeti**

Sogeti is a leading provider of professional technology services, specializing in Application Management, Infrastructure Management, High-Tech Engineering and Testing. Working closely with its clients, Sogeti enables them to leverage technological innovation and achieve maximum results. Sogeti brings together more than 20,000 professionals in 15 countries and is present in over 100 locations in Europe, the US and India. Sogeti is a wholly-owned subsidiary of Cap Gemini S.A., listed on the Paris Stock Exchange.

Sogeti, together with Capgemini, has developed innovative, business-driven quality assurance (QA) and testing services, combining best-in-breed testing methodologies (TMap® and TPI®) and the global delivery model, Rightshore®, to help organizations achieve their testing and QA goals. Sogeti and Capgemini have created one of the largest dedicated testing practices in the world, with over 8,200 test professionals and a further 12,500 application specialists, notably through a common center of excellence with testing specialists developed in India.
