Likvor continues to strengthen its sales organization

Likvor AB is pleased to announce the appointment of Dr. Hadi Ghane, as Sales Director to our team. As "Sales Director", Dr. Ghane will be responsible for the sales activities of Likvors current product portfolio, the LIKVOR CELDA® SYSTEM. Dr. Ghane will be a valuable contributor to and be an active part in the team to build up and prepare the company for future growth and expansion.

Dr Hadi Ghane brings with him 13 years of experience within Biotech and Healthcare industry where he has recently held the position as Sales Director at Beampoint AB. Prior to Beampoint; he has held a variety of managerial positions at Medicall Nordic AB and Biotage AB. Hadi Ghane holds a Ph.D. degree in Organic Chemistry from Uppsala University, Sweden.

Hidden and misdiagnosed disease

Normal Pressure Hydrocephalus (NPH) is a relatively unknown disease that is often mistakenly diagnosed as dementia, Alzheimer's or Parkinson's. This is because the symptoms, including disturbances in gait, confusion and urinary incontinence, are similar to those of dementia, plus that NPH is a condition that mainly occurs in people over the age of 55. Studies have shown that up to 10 percent of dementia patients may actually be suffering from NPH. The condition is many times referred to as reversible or treatable dementia.

Likvor CELDA® SYSTEM is the most advanced system for assessing the flow of cerebrospinal fluid (CSF) that surrounds the brain and spinal cord. It increases the possibility for patients who suffer from NPH to receive a correct diagnosis and the appropriate treatment in the form of a shunt implant that diverts and regulates CSF pressure and flow. An accurate diagnosis means large gains for the patient and family, but also for society as a whole.

Likvor CELDA® SYSTEM is used with a special developed catheter, CELDA TOOLS® that is a disposable for one time use only.
