

## Swedish IT Monitoring pioneer op5 AB partners with Indigo Solutions Europe Ltd to address the growing market demand in the United Kingdom

Press release 2011-05-19

*The leading Open Source Network Management company op5, signs a strategic partnership with Indigo Solutions Europe Ltd., the UK's newest systems integrator in the DDI, Network Security and Infrastructure Monitoring markets. The partnership means in brief that Indigo Solutions Europe Ltd. will sell op5 products for infrastructure monitoring and provide related professional and support services.*

– Indigo Solutions Europe Ltd. has extensive experience and expertise in the field of Infrastructure Monitoring. We see great opportunity in this partnership as we focus on growing our presence in the UK market, said Ralf Labeda head of International Business Development at op5 AB.

– With the advent of virtualisation and cloud computing the volume of systems a company has to look after has grown rapidly. This has led to an increase in demand for comprehensive network/service monitoring from the bare metal hypervisor to individual application response. With op5 you can achieve all of this and more said Steven Carr, Director of Indigo Solutions Europe Ltd.
