PRESS RELEASE - Söderköping, May 2011

Refurbish your floor instead of replacing it

During the Pulire show in Italy starting 24th of May, HTC Sweden will launch a completely new version of the floor renovation system DCS Hybrid™.

The eco-friendly DCS Hybrid™ system is a real problem solver for the stone floor renovation industry as damaged and heavily worn down natural stone and terrazzo floors easily can be brought back to its original quality and shine. Stains, scratches and “orange peel” are removed using the DCS Hybrid™ tools on ordinary cleaning machines and only water.

Benefits with the new DCS Hybrid™ system

The lifespan of the new DCS Hybrid™ system has increased significantly to at least double the lifespan of the old system. The micro scratch pattern is also improved and the system has a much better, overall grinding performance.

With the new softer plastic holder it is easy to put the segments back in place if they should come out due to excessive lippage or screws.

The DCS Hybrid™ tools

The system includes two new tools: DCS Hybrid™ Black and DCS Hybrid™ Red. DCS Hybrid™ Black is the coarser of the two tools and it effectively removes minor scoring, lippage, excessive wear and stains. The less coarse tool DCS Hybrid™ Red removes scratches, wear and stains. DCS Hybrid™ Red, which prepares the floor for further treatment with Twister™, can depending on the floor's condition be used without prior use of DCS Hybrid™ Black.

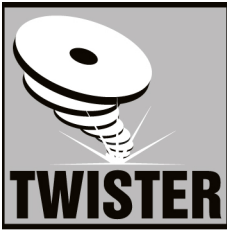

With the launch of the new DCS Hybrid™ system, the old system will be discontinued.
