ASX Signs CameronTec for Continued FIX-based Services

For Immediate Release: Sydney, Monday 23 May 2011: The Australian Stock Exchange (ASX) today announced it will continue to rely on CameronTec's CameronFIX technology to address its FIX-based market services for clients. ASX has offered its customers the compelling functional and financial benefits of CameronFIX since 2005. The latest agreement with CameronTec was completed in Q2 2011 and is based on CameronTec's licensing subscription model.

Andrew Lennox, General Manager - Markets Technology ASX, says, "ASX is grateful to CameronTec for continuing to provide CameronFIX technology, enabling connectivity between the ASX and its exchange clients. ASX and CameronTec have a longstanding and successful relationship, which has delivered an industry standard FIX format with minimum latency to market participants and information vendors."

"CameronTec provides an increasing number of exchanges worldwide with FIX technology to support their business requirements," says Anders Henriksson, CEO, CameronTec. "We are pleased to continue working with the Australian Stock Exchange to power their FIX Infrastructure and provide their clients with the flexibility and performance they require."

At the core of CameronTec technology is a unique understanding of the FIX world that comes from a concentration of the world's largest FIX deployments. With a host of industry-firsts, Catalys and CameronFIX technology provide unprecedented levels of flexibility and innovation that firms need to sustainably differentiate in today's markets.

Meet CameronTec at Upcoming FIX Protocol Events.

CameronTec is next exhibiting at the FIX Protocol's Asia Pacific Trading Summit in Hong Kong, May 25, and the Canadian Electronic Trading Conference in Toronto, June 9. Visit our stand to learn more about latest FIX innovation and meet our team closest to you.

About CameronTec

CameronTec is the financial industry's leading provider of FIX infrastructure and connectivity solutions. Its market innovation Catalys takes FIX further and is the new industry reference for FIX ecosystems.

Catalys is based on the industry's most widely installed FIX engine, CameronFIX. CameronFIX is universally regarded as the reference standard for reliable, mature FIX engine applications. It is the outcome of 14 years continuous investment in performance, scalability, interoperability and robustness. CameronFIX is today used by boutique to larger investment firms, brokerage houses, exchanges and regulators in 25 countries, on all five continents.

With truly dedicated customer service at the core of everything we do, CameronTec has offices in London, New York, Chicago, Stockholm, Paris, Hong Kong and Sydney. CameronTec is an Orc Group Company (SSE: ORC) and Premier Member of the FIX Protocol organization.

About CameronTec Licensing

Standard license agreements follow CameronTec's licensing subscription model; a flexible approach designed to streamline the customer on boarding process and provide ease of access to software updates, together with a mature support framework. Customers are invoiced quarterly, in advance, and revenue allocated to the invoicing period.
