

PRESS RELEASE 8th JUNE 2011

MOBERG DERMA SIGNS DISTRIBUTION AGREEMENT IN AUSTRALIA AND NEW ZEELAND

Moberg Derma AB (publ.) has entered into a distribution agreement with OzHealth Pharma for Emtrix® – for discolored and damaged nails caused by nail fungus (onychomycosis) or nail psoriasis. Under the agreement OZ Pharma Health is granted exclusive rights to market and sell Emtrix® in Australia and New Zealand.

"The agreement is part of our international commercialization of Emtrix®, which now will be marketed in another large market. We currently have secured distributors for Emtrix® in over 20 markets," comments Moberg Derma's CEO, Peter Wolpert.

About Emtrix® and nail diseases

Emtrix® is a prescription free, topical nail product and has the potential to become first-line treatment for common nail disorders. Launch of Emtrix® was initiated in the first markets in September 2010. Safety and efficacy have been demonstrated in several clinical studies including more than 500 patients. Emtrix® has a unique and rapid mechanism of action which brings visible improvements within 2-4 weeks of treatment. Nail fungus is the most common nail disease and afflicts approximately 10% of the general population and increasing with age. The estimated global market potential exceeds USD 1 billion. The untapped potential is significant since many patients remain untreated. It is generally recognized that there is a need for new efficacious and safe topical treatments.
