

HIQ AND JEPPESEN SYSTEMS AB SIGN NEW FRAMEWORK AGREEMENT

HiQ has signed a new framework agreement with Jeppesen Systems AB, specialists in resource optimization in the transport industry. The agreement covers services within project management, software development and quality assurance and is valid through April 2013, with an extension option.

"Jeppesen Systems and HiQ have had a long-term and fruitful partnership since 2000. HiQ provides Jeppesen with professional services, primarily within software development and quality assurance. We see this newly signed framework agreement as a sign of Jeppesen's confidence in HiQ and a confirmation that we have a satisfied customer," says Simona Bamerlind, Account Manager at HiQ.

"We are very pleased with HiQ's work and have had a strong partnership with them for many years. We have now signed a new framework agreement, and we are looking forward to continued fruitful collaboration with HiQ over the coming years," says Michael Brusberg, Managing Director of Jeppesen.

As more and more software is built into various products, the need for expertise in developing and integrating software grows. HiQ specialises in this field, and HiQ's consultants have vast experience in many areas of development, with extensive knowledge of technology, integration, security and testing.

"At HiQ, we are very focused on achieving results and making life easier for our customers. Jeppesen is at the forefront of new technology, and it's very inspiring to be able to influence, create and improve the technology," says Jerker Lindstén, Managing Director of HiQ Gothenburg.

Jeppesen Systems AB, a wholly owned subsidiary of Boeing, works with creating powerful planning and resource optimisation tools in the transport sector, primarily within the aviation industry. Customers include such leading companies such as KLM, SAS, Lufthansa, British Airways, Singapore Airlines, Delta Airlines, Deutsche Bahn, DSB and Green Cargo. Jeppesen in Gothenburg has approximately 300 employees and was founded in 1994 as Carmen Systems.
