DVB Bank uses op5 Monitor to keep full control of the payment system

Munich based DVB Bank has just implemented op5 Monitor as a company-wide monitoring solution. The niche bank, which is specialized in customized financial services to the transport sector, had searched for a system which could monitor its entire business chain. op5 and its partner Consol provided the solution.

DVB wanted a system that not only checks that applications are working, but one that also monitors all business processes. The bank wanted to make sure that applications perform as required and that all data is delivered at the right time and in the correct format. As an example, the bank can verify that payment system output to the Central Bank has been created and delivered on time. This gives DVB control over the entire chain.

“In our procurement of surveillance, it was our biggest challenge to find a solution that could meet all these requirements in one central system. op5 was the only company who could cope with all this,” explains Stephan Gottschalk, Network Engineer at DVB.

“We are very pleased to have DVB as our customer.” says Jan Josephson, CEO at op5. “DVB now have a highly flexible and robust system that can be adapted by their IT department to suit their changing needs.”

About DVB Bank

DVB enjoys a unique position, thanks to its strategic focus on the international transport market, with the submarkets of shipping, aviation, and land transport. As a highly-specialised niche provider, the Bank offers a broad range of customised financial services.

With offices in 13 locations, DVB has a worldwide presence in the transport markets and their various segments. This global presence enables the bank to take into account both the international dimension and the local specifics of the markets in which their clients in Shipping, Aviation and Land Transport Finance operate.

About Consol Software

Consol Software GmbH as a partner of op5, runs the support concerning op5 and Nagios. A team of op5 certified monitoring experts assures optimized communication and immediate handling of incoming tickets. In addition to the support, a continuous improvement process seeks to ensure and further enhance the monitoring landscape of DVB Bank. www.consol.de

About op5 AB

op5 is a Swedish market leading developer of open source based, unified IT Monitoring solutions. op5's product, the op5 Monitor, delivers enterprise-class network, system, application as well as web and cloud service monitoring at a fraction of the cost of proprietary solutions.

More than 700 organizations worldwide depend on the op5 Monitor for their monitoring needs. Their customers include the Governments of Sweden, Australia and Poland, Linde Group, Time Warner Cable, SAAB Industries, Amnesty International, DVB Bank and Volvo.
