

## **New Healthcare Staffing Locum Jobs at Pinnacle Healthcare**

[Pinnacle Healthcare](#) has announced details of UK jobs available immediately for the following specialisations: Audiologists, Dietetics, Cardiology, Ergonomic Assessors, Mammography, Occupational Therapists, Optometry, Pharmacy, Phlebotomists, Physiotherapy, Podiatry, Radiography, Sonographer, Speech and Language Therapists

[Pinnacle Healthcare](#) the UK medical staffing agency, offers on-line pre-registration for locum doctors and AHP professionals allied to medicine. The agency contacts the candidate to arrange a meeting at a convenient local location, close to the candidate's home or workplace, at a time to suit the doctor or AHP. An agency consultant will then meet with the candidate and assist in the process of registration, including document checking and scanning.

“ Our systems enable a precise match of the candidate and the job requirement. We can achieve this almost instantly from the comprehensive database we have developed, with advanced compliance monitoring, to ensure that the locums we place are suitably qualified and reference checked,” according to [Pinnacle Healthcare](#).

Employers of locum doctors and AHPs choose [Pinnacle Healthcare](#), the agency says, because the staffing agency offers an advanced system for UK compliance in the management and booking of staff.

Enterprise is a staff management ICT system developed by the agency for locum registration, compliance, selection and booking. It results from 100,000 hours of development time in-house over six years.

System safeguards ensure safe and consistent selection of qualified staff who meet the criteria of the hospital or primary care employer requiring temporary locum cover. Enterprise only allows selection of agency staff after completion of registration: once all relevant, employment, training & CRB checks and references are fully confirmed and the work record is checked, verified and finally cleared.

For booking safety, agency locums and other healthcare staff are selected for shifts only from verified data recorded on Enterprise. Agency consultants match the exact requirements of clients according to staff qualifications, experience and availability.

Agency registration and compliance processes include mandatory face-to-face interviews to confirm identity and language ability; completion of a detailed registration form, including full details of career history and qualifications; details of referees; original 'right to work', qualifications and training certificates; and an employer's report.

UK Locum posts currently available include the following specialisations Audiologists, Dietetics, Cardiology, Ergonomic Assessors, Mammography, Occupational Therapists, Optometry, Pharmacy, Phlebotomists, Physiotherapy, Podiatry – as well as Radiography, Sonographer, Speech and Language Therapists.
