## Sectra launches support for breast tomosynthesis images in PACS

**At RSNA 2011 in Chicago, [Sectra](#) will showcase support for the display and review of breast tomosynthesis images in Sectra Breast Imaging PACS.**

Tomosynthesis is an emerging technology within breast imaging. Since most PACS do not support images of this type, a dedicated modality workstation is usually needed in order to read tomosynthesis images. With Sectra's solution, mammography clinics will now be able to include reading of tomosynthesis images in their regular reading workflow, which will significantly contribute to increased efficiency.

“Sectra is one of the first imaging vendors to offer a Breast Imaging PACS with support for reading tomosynthesis images. This underlines our commitment to transforming customer needs into efficient medical-imaging IT solutions,” says Anders Granlund, product manager at Sectra.

Mammography imaging IT is one of the niche market in which Sectra holds a leading position. Sectra Breast Imaging PACS features true multi-modality capabilities and offers instant access to all the advanced diagnostic tools needed by a radiologist in a single diagnostic workstation. Regardless of modality or vendor, all breast images are automatically aligned and displayed side-by-side in the same size and dimension.

Visit Sectra at RSNA in Hall B, booth 9117.

### **About Sectra**

Sectra develops and sells IT systems and services for radiology, women's health, orthopaedics and rheumatology. More than 1,100 hospitals, clinics and imaging centers worldwide use the systems daily, together performing over 55 million radiology examinations annually. This makes Sectra one of the world-leading companies within systems for handling digital radiology images. In Scandinavia, Sectra is the market leader with more than 50% of all film-free installations. Sectra's systems have been installed in North America, Scandinavia and most major countries in Europe and the Far East.

Sectra was founded in 1978 and has its roots in Linköping University in Sweden. The company's business operations include cutting-edge products and services within the niche segments of medical systems and secure communication systems. Sectra has offices in 12 countries and operates through partners worldwide. Sales in the 2010/2011 fiscal year totaled SEK 784 million. The Sectra share is quoted on the NASDAQ OMX Stockholm AB exchange. For more information, visit [www.sectra.com](http://www.sectra.com)
