

PRESS RELEASE DECEMBER 9th, 2011

MOBERG DERMA AND MENARINI GROUP SIGN AGREEMENT FOR EMTRIX IN ITALY

Moberg Derma AB (STO: MOB) has entered into a distribution agreement with Menarini Group for Emtrix[®] – for discolored and damaged nails caused by nail fungus (onychomycosis) or nail psoriasis. Under the agreement Menarini's OTC Division is granted exclusive rights to market and sell Emtrix[®] in Italy under the trademark YouDerm Emtrix[®].

"The agreement is part of our international commercialization of Emtrix[®]. As the leading Italian pharmaceutical group, ranked 34th in the world, Menarini is well positioned to make Emtrix[®] a success in Italy. Emtrix[®] will now be marketed in all large markets in Europe, in US and Australia", says Peter Wolpert, President and CEO of Moberg Derma.

About Emtrix[®] and nail disease

Emtrix[®] is a topical treatment used to treat nail disease. Launched in the Nordic region in autumn 2010, it quickly became market leader. Emtrix[®] is a prescription free, over-the-counter product sold under the name Nalox[™] in certain markets and under the name Kerasal[®] Nail in the U.S. Safety and efficacy have been demonstrated in several clinical studies including more than 600 patients. Emtrix[®] has a unique and rapid mechanism of action which brings visible improvements within 2-4 weeks of treatment. Nail fungus is the most common nail disease and afflicts approximately 10% of the general population and increasing with age. The estimated global market potential exceeds USD 1 billion. The untapped potential is significant since many patients remain untreated. It is generally recognized that there is a need for new efficacious and safe topical treatments.
