ReadSoft & ACOM partner to deliver comprehensive document automation solutions to the Sage ERP market in North America

ReadSoft, a leading provider of document process automation solutions, announced today that its market-leading DOCUMENTS solution is being jointly marketed and delivered to Sage ERP customers, on the North American market, in conjunction with ACOM Solutions Inc., a gold level Sage Development Partner specializing in document process automation.

ReadSoft's advanced document capture tools are now integrated with ACOM's EZContentManager to provide an all-inclusive document automation solution to Sage ERP users. Through EZContentManager's one-click easy-access technology, users can electronically archive, scan, link together, or quickly find any document without leaving their ERP interface. This combined solution allows Sage ERP customers to receive a solid, end-to-end, business process solution that effectively addresses both their business process and compliance requirements – all delivered with a solid ROI. ACOM's EZContentManager is currently delivered throughout North America with expansion into Europe and other markets beginning in 2012.

According to Joe Torano, Vice President of ACOM's Channel Division, "ReadSoft's best-of-breed enterprise capture tools are a great complement to ACOM's document process automation suite, and will enable users to improve processing of any combination of incoming documents. Our customers were looking for more advanced functionality from an imaging solution, and we are excited to partner with ReadSoft, as they are one of the best in the industry."

"Our partnership with ACOM offers outstanding business process opportunity and ultimately expands the return on investment our mutual customers receive," said Robert Monio, Director of ReadSoft's North America Channel Partnerships and Alliances. "Together we look forward to enhancing the competitive edge our customers in the Sage ERP market receive through this valuable product offering."

"This exciting alliance with ACOM stems from the promising success of our growing partner network to date," says Peter Hörwing, Senior Vice President, Sales and Marketing for ReadSoft. "By aligning with ACOM in North America, we are extending the benefits of ReadSoft's advanced document capture tools to Sage ERP users together with an industry leading document process automation provider."

About ACOM Solutions, Inc.:
For over 28 years, ACOM has automated the document and payment processes for more than 4,000 organizations. ACOM's Electronic Document Management solutions quickly add value to an organization's existing Sage ERP, JDE, SAP, MS GP/AX or other ERP system; they dramatically improve an organization's efficiency, by eliminating paper (along with the associated errors and storage costs), as well as automating their manual, paper-based processes.
